		<p>* Invasive Animal Lists for the City of Portland [Lists] are based on the results of the 2010 ‘City of Portland Terrestrial and Aquatic Invasive Animal Assessment’ [Assessment], discussions with regional and national experts and stakeholders, and the recommendations of the City of Portland’s Terrestrial Ecology Enhancement Strategy Advisory Group.</p> <p>Several taxonomic groups were not included in either the Assessment or the Lists: planktonic crustaceans, annelids, polychaetes, and fish. These taxa contain numerous invasive species and may be included in future versions of the Lists.</p>
