

Meeting Notes

Program Advisory Committee Meeting

Date: 4/14/11

Time: 10:30 A.M. – 12:00 P.M.

Location: EBS Conference Room

Discussion Topics

- System Patching - Information was provided on two options that EBS can take with regards to patching. Option one is to patch now. With this option configuration, testing and changes will continue. There may be some impact to our usual work, and there will be one week of downtime to the system with no changes going into production (5/5 through 5/12). Option two is to delay patch until Fall 2011 but we do delay patching must be done then. There was minimal patching done in the fall of 2010. We can continue to configure labor changes and do testing as usual with no risk to production.

The ESC reviewed the options and patching is now moving ahead. There is a contingency plan that if any event will extend downtimes or slow configuration / testing then patching will stop, the system will be restored with the back up copy and patching would then be delayed until Fall 2011. SRP has been refreshed and patched and testing has begun with parallel payroll and scripts.

- Prioritization for Change Requests– Discussion took place about process owners/Bureaus' by providing EBS with their prioritization of change requests when there are multiple high priority items in a bureau or process area. As an example Jane Kingston provided a handout for her area in financial services (handout attached). It was brought up that the PAC Sub Committee that met this month already discussed this issue and thought it was a great idea. The idea of our customers providing additional guidance within SAP areas would be beneficial to EBS so we can work more efficiently. It was brought up that we should consider if this requires any new resources or time in doing the extra step of a second level of prioritization. After discussion it was decided to proceed with this process.
- Prioritization for BOBJ - A proposal by EBS was present that the PAC and the PAC Sub Committee be the forums for prioritizing Business Objects requests. Discussion included that prioritization is needed because it can and will include non-SAP data used in reporting which expands the scope. There are shared resources in Bureaus that can be a constraint. Efficient use of resources should be considered to avoid duplication (Ex: Use enterprise approach -if it is valuable do it once across all Bureaus). There are different levels of prioritization: Availability of data and tool deployment to decide where to expand into what areas. (Ex: WEBI, Crystal reports, Excelcius for dashboards). Prioritize corporate report development (Ex: FM reports with procurement or HR). It was brought up that perhaps there should be a separate Sub Committee for this because some current members would not have the expertise in some areas. EBS requested that if that is what is preferred, then the delegate to the sub committee be empowered to make a decision in the meeting. It was discussed that there is more to this than just prioritization – it is effectively defining a strategy with Business Objects. The Sub Committee would then present to the PAC. It was decided to proceed with this approach and Jane Braaten will facilitate putting together a new Sub Committee.

Reports and Updates

- Effective Use of SAP– It was reported that PBOT has completed their look at the finance area and next week will start looking at the timekeeping area.

- Change PAC Meeting schedule - It was decided to proceed with moving the PAC meetings to the 3rd Thursdays of every month starting in May 2011. The next meeting will be May 19th from 10:30 AM to Noon in the EBS Conference Room on the 14th floor of the Portland Building.
- Help Desk Tickets, Labor Agreements, Change Requests, New Functionality, and Roadmap - See presentation for information. (Note that a page was added to the presentation showing the 33 current High Change Requests and that the new functionality of First Call is a high priority by the Mayor's office)
