Portland's Approved Leaf Blowers

Per Portland Code 18.10.035 - September 1, 2009

The following is Portland Oregon's list of approved blowers permitted for use in the City of Portland. There are two primary categories for leaf blower use in the City of Portland. One is the more restrictive 65 dBA (ANSI B175.2-2000) standard for warmer months from March 1st to October 31st each year. The second category is the 70 dBA (ANSI B 175.2-2000) standard for the fall / winter season from November 1st through February 28th. The City has recognized the need for a more powerful blower to move leaves in our wet fall leaf season.

Please note that any leaf blower that complies with the 65 dBA noise standard is approved for use year round.

Additions to the list will be made by the City after review and confirmation of submitted ANSI test results. Manufacturers are welcome to supply the City with third party compliance testing information at any time they feel a new unit is ready to be added to our approved leaf blower list for operation in the City of Portland.

Electric Blowers:

Manufacturer	Model Number and Notes	65 dBA Approved for use Year round	70 dBA Approved for use November 1 to February 28	Handheld Backpack
