

Sellwood Library Tree Walk

Please see inside for a listing of the trees represented by the numbers on this map.

The City of Portland requires a permit to plant, remove, or prune any street tree. Call the Urban Forestry Division at 503-823-4489 for the free permit and to consult with a Tree Inspector. Inspectors are certified ISA arborists and will assist the property owner in selecting the best tree, determining the appropriate location for planting in the public right-of-way, and answering other street tree care questions.

Go to www.portlandparks.org for tree care information, Portland's Heritage Tree Program, and other neighborhood tree walks.
