

## Housing

## HOPWA

The goal of the HOPWA program is to provide affordable housing and housing-related services to people living with HIV/AIDS (PLWHA). In the Portland Eligible Metropolitan Statistical Area (EMSA), there are more than 3,923\* people living with HIV/AIDS. Research released at the National Housing and HIV/AIDS Research Summit in March 2008 shows that providing housing for homeless people living with HIV/AIDS improves health outcomes and saves millions in medical costs. Preliminary data showed that receipt of housing assistance is associated with fewer overnight hospitalizations, emergency room visits and opportunistic infections and significant improvements in medication adherence and mental health. The study also showed a 40% reduction in the number of people who traded sex for shelter – a significant prevention problem among homeless people living with HIV.

### HOPWA NEEDS

The Portland EMSA has received direct allocations of HOPWA funds from HUD annually since 1994, when the cumulative number of AIDS cases diagnosed within its boundaries first exceeded 1,500. HUD has expanded the boundaries of the Portland EMSA over the years to its current configuration of seven adjoining counties in Northwest Oregon and Southwest Washington.

HOPWA funds are intended to address the housing and housing-related service needs of PLWH/A. In 2008, The National AIDS Housing Coalition released a groundbreaking study, “Examining the Evidence: The Impact of Housing on HIV Prevention and Care.” The study concluded that housing status has been identified as a key structural factor affecting access to treatment and health behaviors among people living with HIV/AIDS (PLWHA), and research shows that receipt of housing assistance is associated over time with reduced HIV risk behaviors and improved health care outcomes, controlling for a wide range of individual characteristics (poverty, race/ethnicity, substance use, mental illness) and service use (primary care, case management, substance abuse treatment) variables. These are exciting findings, signifying the potential of housing interventions to improve the health of PLWH and reduce the number of new infections. For further detail, see [www.nationalaidshousing.org](http://www.nationalaidshousing.org).

The study supports the development and implementation of a new HIV prevention and care strategy in the United States, based upon the proven effectiveness of and primary importance of housing as a structural HIV

### HOPWA

prevention and treatment intervention. Among its many findings, the study confirmed that homelessness places people at heightened risk of HIV infection.

AIDS advocates have long held that stable housing is the cornerstone of HIV/AIDS treatment, because it is a necessary pre-condition for good self-care. Elaborate medication regimens may require that PLWHA refrigerate medications and administer them in accordance with a strict schedule. Moreover, stable housing contributes to sobriety and/or a decrease in substance abuse.

Some PLWHA find that, once they have permanent housing, they are able to return to productive work and social activities.

The Multnomah County Health Department's Health Assessment and Evaluation Group reported that as of December 31, 2008, an estimated 3,923 individuals with HIV/AIDS lived in the Portland EMSA. This number included 2,434 people living with a diagnosis of AIDS (PLWA), and 1,189 people living with HIV, who are HIV positive, but whose disease does not meet the diagnostic criteria for AIDS (PLWH). 303 new AIDS cases and 296 new HIV cases (non-AIDS) were reported during the last two years (1/1/07 through 12/31/08).

Because the Center for Disease Control (CDC) estimates that 25% of people infected with HIV are unaware of their HIV status, the true number of PLWH in the EMSA is probably closer to 1,486.

Although HIV is still primarily a disease of men, 12.8% of HIV cases and 12/5% of AIDS cases diagnosed in 2007 and 2008 occurred in women.

HIV in the EMSA continues to primarily impact adults. Youth (persons aged 13 to 24) now make up 6.9% of PLWH and 18.6% of new HIV cases. The EMSA's PLWH/A is aging. Persons aged 50 and older account for 30.8% of all PLWH/A in the EMSA.

Overall, the composition of the PLWHA in the EMSA has remained fairly constant over the past several years, with only slight increases in the percentages of Hispanic and older PLWH/A.

In the Portland EMSA HIV has disproportionately impacted Blacks/African Americans. Blacks/African Americans account for only 2.8% of the population, but make up 8.2% of PLWH/A – almost three times higher.

It is estimated that there are 37,491 homeless individuals in a one-year period living within the Portland EMSA, representing 17% of the total EMSA population. Based on case management and medical care databases and recent PLWHA surveys, there were an estimated 612 homeless individuals in 2008,

# Housing

representing 15.6% of the total PLWH/A population in the EMSA. It is clear that HIV/AIDS disproportionately impacts the homeless population.

**HOPWA**

The Oregon Department of Corrections (ODOC) reports that as of October 2009 there were 65 identified inmates diagnosed with HIV/AIDS, and estimates that 1.2-1.8% of their incarcerated population is infected with HIV, up to 4 times the number of those who self-identified. In 2008, Multnomah County, the largest county in the EMSA, had 717,880 residents and 24,578 unduplicated inmates booked in its corrections systems (3.4% of the total population). Multnomah County Corrections reported that 216 inmates detained at its correctional facilities were identified as PLWH/A during 2008 either through jail testing or self-identification. Additionally, the HIV Health Services Center, the largest HIV primary care provider in the state, reports that approximately 5% of clients are incarcerated over the course of a year, with 15-20% of clients having been incarcerated sometime in their life. In 2009, Cascade AIDS Project, one of the largest HIV service providers in the EMSA, reported that of the 1680 clients it served, 42.9% reported a recent criminal history.

This chart provides HIV/AIDS data for individuals sorted by race and sex in the Portland EMSA. Data on familial status is not currently available.

## HOPWA

The Clark and Skamania County numbers are estimates as of 12/31/09 and are from Washington State Department of Health, Jeff Carr. This chart indicates there are 3,928 PLWHA, five more than the number listed in the introduction. This discrepancy is due to the Washington numbers including 2009.

PLWHA also typically have high medical expenses. As a group, they are less likely to have private health insurance to meet these expenses. Unless the PLWHA has secured long-term rent assistance (e.g. a Section 8 voucher), a public housing unit or a HOPWA unit, PLWHA is not going to be well equipped to compete in the housing market.

Although demand by PLWHA for affordable housing is strong, the supply is very limited. The HUD guideline for affordability is that a household should spend no more than 30% of its income on rent and utilities. The purpose of this guideline is to ensure that a household has enough money after rent to pay for food, health care, and other necessities. Using this 30% rent burden guideline, units at fair market rent are out of reach for the average PLWHA. This Consolidated Plan documents that there is a severe shortage of affordable housing for the lowest income households: there are more than 13,000 households with incomes below 30% MFI than there are units affordable to them (2000 Census Data). The following chart is a comparison between what an SSI recipient can afford to pay and current fair market rents.

**Households that pay more than 30% of their income for rent are considered rent-burdened. Households that pay more than 50% of their income for rent are severely rent-burdened and are at increased risk of homelessness.**

Market Rate / Income Gap Chart					
HOUSEHOLD INCOME FOR SSI RECIPIENT	AMOUNT AVAILABLE MONTHLY FOR RENT & UTILITIES	MONTHLY FAIR MARKET RENT FOR STUDIO	GAP	MONTHLY FAIR MARKET RENT FOR ONE-BEDROOM UNIT	GAP
\$674	\$202	\$626	\$424	\$726	\$524

A PLWHA on SSI would have to spend almost 100% of his/her income on housing to afford a studio at Fair Market Rent. Even if the PLWHA has found below-market housing, these numbers suggest that the PLWH/A must spend up to 60% of monthly income on rent, an intolerable rent burden that creates a significant risk of homelessness. A rent-burdened PLWHA will routinely choose between paying rent and purchasing food, health care and other necessities.

As a consequence of household poverty and limited housing resources available to PLWHA, an estimated one-third to one-half of PLWHA are either homeless or so rent-burdened that they are at risk of losing their homes.

## Housing

## HOPWA

HIV Care Services and the Planning Council utilized results from 2008 client surveys and community forums to assess the service needs and gaps of PLWHA in the Portland EMSA. The methodology behind the service gaps section of the 2008 Client Satisfaction and Needs Assessment (completed in April of 2009) was based on We Listened: 2005 Survey for People Living with HIV and AIDS, which was a detailed assessment of service needs, gaps, and barriers for PLWHA in the Portland EMSA. The 2008 Client Satisfaction and Needs Assessment (CSNA) asked case management clients if they had needed 10 specific services in the past year, and whether they always received the services when they needed them. Those who had not always received services when needed were considered to have a service “gap”. Respondents reported significant gaps in access to dental care (24%), money for housing/other housing help (35%), mental health counseling/treatment (15%), case management (15%), and supportive services (15%).

### HOPWA PROGRAM DESCRIPTION

HOPWA is a flexible grant award that allows communities to design and implement long-term, comprehensive strategies for meeting the housing needs of people living with HIV/AIDS and their families. HOPWA gives participating jurisdictions the flexibility to provide a range of housing assistance, including:

- a) Support services
- b) Project- or tenant-based rental assistance
- c) Resource identification and technical assistance

Each year since the Portland EMSA became eligible for HOPWA in 1994, a portion of the funds have been used for permanent housing development. The following table describes the geographic spread of HIV/AIDS housing and also the array of unit sizes. Ninety-nine of these units are part of the permanent HOPWA development portfolio. The remaining units are Shelter + Care units that Cascade AIDS Project has leveraged with match from HOPWA funded and Ryan White funded supportive services. As confidentiality is very important in HIV/AIDS housing, project names are not included.

## Housing

\* The FY 2005-06 Action Plan reported 156 units. However, HUD determined that capitalizing operating subsidies was not an eligible use for HOPWA funds. The funds were re-allocated as project-based assistance and the units that were affected by the change have been removed from the total.

### PROGRAM TOOLS

- Facility-based transitional housing
- Project-based rent assistance
- Tenant-based rent assistance
- Short-term mortgage, rent, and utility assistance
- Housing placement assistance
- Housing case-management
- Alcohol and Drug Counseling
- Mental Health Counseling
- Benefits Eligibility Specialist
- Employment Specialist
- Grants for rehab of existing housing

# Housing

## HOPWA

### PROJECT SELECTION

The Portland EMSA currently allocates approximately 45% of its HOPWA funds to rent assistance, 30% to support services, 18% to rehabilitation of the HOPWA development portfolio, and 7% to administration. This allocation formula is reviewed annually by the AIDS Housing Advisory Committee.

The funding available for the rehabilitation of the HOPWA development portfolio, the benefits eligibility specialist and the employment specialist are unspent entitlement funds awarded over several fiscal years and will not be available again. There will be two RFP's in the spring of 2010 to award funds to organizations for the benefit and employment specialists. Both of these positions will be for two years. Owners with HOPWA units in their portfolio will apply to PHB for the rehabilitation dollars available. Preference will be given to projects developed before 2000. Rent assistance and support service funds were awarded in the spring of 2009 through a competitive process. Contracts will be renewed based on subrecipient performance.

### PROGRAM ELIGIBILITY

Individuals with HIV or AIDS and their families who reside in the seven-county Portland EMSA and have incomes up to 80% MFI are eligible to participate in HOPWA programs. Priority is given to households with incomes below 50% MFI. The EMSA includes Clackamas, Columbia, Multnomah, Washington, and Yamhill Counties in Oregon and Clark and Skamania Counties in Washington.

### POTENTIAL BARRIERS

All of the AIDS service organizations have seen a significant increase in clients due to the economy over the past few years. This increase in clients has created a need for increased funding, which is frequently not possible.

CAREAssist (Oregon's AIDS Drug Assistance Program) pays for insurance premiums and prescription/medical services co-pays. CAREAssist clients have increased over 200% in the last six years. This increase has put a strain on the programs and the Department of Human Services are looking for ways to cut costs to avoid having a waiting list for services.

Over the past several years, the EMSA has experienced significant, on-going reductions in funding for clinical and non-clinical services for PLWHA. The Oregon Health Plan (OHP)/Medicaid is a source of insurance but it has been

### HOPWA

restricted for several years, thereby reducing the number of clients who are enrolled in this insurance. Most uninsured PLWHA enroll in the Oregon Medical Insurance Pool, a high-risk pool that provides fewer benefits and significantly lower reimbursement rates than OHP/Medicaid. In addition to these direct impacts, OHP restrictions have resulted in increased needs for case management to find alternative insurance coverage for clients. The OHP Plus program (which is for those who are categorically eligible for Medicaid) recently instituted reductions in dental and vision benefits for clients which will create a further burden on the continuum of care for PLWHA. In Washington, the Basic Health Plan is currently closed to new enrollment and needs to cut 43% of clients from their enrollment in this biennium. Because the health systems in both Oregon and Washington are complicated and the cost of losing coverage is so high, case managers spend as much as 50% of their time helping clients to obtain and maintain health coverage. If the insurance challenges could be resolved, the case managers would be able to better help clients stabilize.

Both the Washington State and Oregon State general funds are experiencing shortfalls which will most likely affect STD, HIV prevention and care funding. Washington State is anticipating a budget deficit, resulting in a 14% cut in state dollars for HIV prevention and HIV care services. As a result, Washington ADAP may face shrinking eligibility criteria and decreasing the formulary to include only antiretrovirals. The Oregon Ryan White Part B Care Assist program has had a 15% increase in 2009 program enrollment in comparison to 2008 reflecting the increase in unemployed clients on top of a double digit percentage increase in enrollment numbers for the past five years. Ryan White housing programs have seen an increase in requests for housing assistance, debt guidance, and consumer counseling. The Multnomah County HIV Health Services Clinic experienced a significant cut in its County General Fund allotment, and there were reductions in partner contributions to raise productivity within primary care services, and decreases in case management staffing during a time of increasing case loads. Basic needs funding has also seen a trend of fiscal cuts over the past few years and both the overall social service system and the Part A program are being bombarded with clients whose needs are severe and ongoing, a phenomenon that has been exacerbated during the recent economic downturn.

The HOPWA tenant-based rent assistance program, a time-limited program that allows a PLWHA to rent an apartment of his/her own choosing, was designed on the assumption that the tenant would qualify for a Section 8 voucher before the rent assistance was exhausted. That has not been true for

## Housing

## HOPWA

several years. The federal government is not funding Section 8 at a level that keeps pace with increased program costs and, indeed, has sought repeatedly to cut the program's budget and reorient it towards serving moderate-income households. Some local housing authorities have waitlists of almost 4,000 households, and waiting time for a voucher is in excess of 3 years. Accordingly, the tenant-based rent assistance (TBRA) program no longer depends on transitioning clients to a Section 8 voucher. Instead, TBRA programs operate with the hope that clients will secure income through employment or social security. As discussed earlier, most SSI recipients are severely rent-burdened, and PLWHA cannot always maintain consistent, full-time employment because of changes in their health

### PARTNER AGENCIES AND ORGANIZATIONS

- Cascade AIDS Project (CAP) provides case management to 59 units of HOPWA funded permanent supportive housing at the following sites: Carriage Hill, Cornerstone, McCoy Village, Nathaniel's Way, PCRI scattered sites, Project Open Door, Madrona Studios with Central City Concern, Outside In Transitional units, Northwest Housing Alternatives, Villa Capri and Howard House with Catholic Charities, and the Sandy Apartments with Luke-Dorf. The Luke-Dorf partnership began in 2009 and the units were filled in 2010. CAP also partners with the Housing Authority of Portland and Washington County Department of Housing to receive 69 Shelter Plus Care units for people living with HIV/AIDS in the Portland EMSA. The 69 Shelter Plus Care vouchers are leveraged with other support service programs such as HOPWA, HOPWA Special Projects of National Significance (SPNS), and Ryan White. CAP also operates a transitional housing program that houses 18-20 individuals and families with children each year. In 2009 CAP began to offer eviction prevention, utility, and mortgage assistance to 40 individuals and families with HOPWA Short-Term Rent, Mortgage, and Utility Assistance (STRMU). CAP manages and disburses a rent assistance fund to meet the HOPWA rent standard on all HOPWA units. CAP administers Ryan White funded emergency rental assistance and a Transitions to Housing Program to more than 190 households per year. CAP operates a client education program; Positive Directions that provides tenant education and Money Matters workshops for PLWHA. CAP also has a Warehouse Program to aid people that require furniture and/or moving assistance. CAP partners with Our House of Portland to provide housing and supportive services

### HOPWA

for those in the Neighborhood Housing and Care Program. In 2007, CAP partnered with the Oregon Department of Human Services to provide housing for 20 adults living with HIV/AIDS, who are exiting the criminal justice system, with no housing resources. In 2008 CAP again partnered with the Oregon Department of Human Services and Cascadia Behavioral Healthcare to provide housing and support services to 25 adults living with HIV/AIDS, who have a mental health diagnosis and are in need of mental health supportive housing. Both of these partnerships with Oregon DHS are HOPWA Special Projects of National Significance. CAP partners with the Housing Authority of Portland to receive short-term rental assistance funds (STRA) for eviction prevention, move-in costs and medical motel vouchers for approximately 30 individuals and families living with HIV/AIDS. These funds include the Homeless Prevention and Rapid Re-Housing Program (HPRP) stimulus funds. In collaboration with Transition Projects Inc. CAP receives supportive housing funds to assist two chronically homeless individuals and eight homeless women.

- Central City Concern (CCC) owns and operates 36 units of permanent supportive alcohol/drug free housing for PLWHA. CCC is both the housing and the service provider for residents in this development. In 2007, CCC instituted a priority for PLWHA at the Biltmore, a project with 76 units of single room occupancy (SRO) housing, each with an attached Project-based Section 8 certificate. In 2010, CCC began offering similar waitlist priorities for Project-Based Section 8 units at Madrona Studios and at the HAP-owned/CCC-managed Martha Washington Building (studios and one-bedrooms). CCC has partnered with Cascade AIDS Project for provision of coordinated services at all three properties. In addition, Ryan White Part A funds support the Healthshare Program which provides 96 rental months of alcohol and drug free housing as well as substance abuse treatment support for 32 PLWHA.
- Clark County Public Health has a program similar to CAP's that operates in Clark County, Washington. Clark County Public Health (CCPH) provides housing case management on the three permanent supportive housing units built with HOPWA investment and is prepared to provide housing case management to future housing developments. CCPH also operates a transition-in-place housing program.

## Housing

## HOPWA

- Multnomah County Health Department enjoys a longstanding collaborative relationship with the City of Portland's HOPWA program, allowing for coordination of resources and funding to maximize the efficiency and benefit of public dollars. In addition to administering the approximately \$3 million in Ryan White Part A fund the STD/HIV/Hepatitis C Program also offers; Through individual, group, and community level strategies, persons at highest risk for acquiring and/or transmitting STDs, HIV, and viral hepatitis are offered Risk Reduction Classes and Community Education, Outreach & Recruitment to Testing, Community Testing, STD Screening and Treatment, Syringe Exchange and Disposal, Disease Intervention and Partner Services, African-American Sexual Health Equity Program (AASHEP), and a number of evidence based interventions to reduce transmission between men who have sex with men.
- Outside In provides long term transitional housing and case-management to HIV+ youth. They have an on-site housing facility.
- Our House of Portland provides the only housing with on-site sub-acute care for people living with advanced HIV/AIDS in the Portland metro area and throughout the state of Oregon. Our House provides food, support services, and specialized care through funding from various governmental and private funders. The program has approximately 160 volunteers who provide daily meals and support. In 2004, Our House of Portland became the first agency in the EMSA to receive a competitive HOPWA grant. Our House was awarded \$1.3 million to reconstruct its building and to start the Neighborhood Housing Program to assist clients who are well enough to move back into the community. This grant was renewed in 2007 for \$1.03 million to continue the NHCP program and help with operating costs for the new facility. Our House has applied for another three-year renewal starting September 2010. Our House provides a continuum of care for people with HIV/AIDS through the following programs:
  1. Our House of Portland is a 14-bed specialized residential care facility located in Portland where 24-hour nursing services are provided to those with advanced HIV/AIDS. Residents from this facility come from all over the state of Oregon.
  2. Swan House is a 5-bed adult foster care facility located in Clackamas County where care in a group setting is provided for those with HIV/AIDS that are not quite able to live independently and need assistance

### HOPWA

with many of the daily tasks of medication management, money management, etc.

3. The Neighborhood Housing and Care Program (NHCP) is an innovative program where rental assistance, nursing, social work, and Occupational Therapy services are provided to those with HIV/AIDS who want to maintain living independently. Services are provided on a regular basis (frequency depends on client acuity) and is custom tailored to the needs of each client.

4. Community Services include Esther's Pantry, which is a food bank for HIV Positive individuals, and Tod's Corner which is a thrift shop for the same population. We also provide assistance with pet care and cremations.

### COMPLEMENTARY LOCAL, REGIONAL, AND NATIONAL EFFORTS

This program complements other local efforts to meet the needs described above by partnering with Ryan White Title I Planning Council efforts to provide a continuum of care and services.

The AIDS Housing Advisory Committee (AHAC) is an advisory body to HOPWA program staff. AHAC's role is to advise, coordinate, and advocate. AHAC relies on three action steps to guide their 2010-11 work plan: coordination, employment, and evaluation.

### COORDINATION

1. Support agencies and community leaders who are advocating for increased services funding in response to health care and services funding cuts.
2. Participate in and support upcoming systems integration trainings and planning sessions working for clear, structural linkages between housing and services systems.
3. Advocate for the representation of HIV/AIDS housing providers and consumers on housing and homelessness planning entities.
4. Review Homeless Management Information Strategies (HMIS) policy and procedures and advocate for appropriate and adequate confidentiality protection measures for people living with HIV/AIDS.

## Housing

5. Work with Ryan White Title I Planning Council to establish linkage among housing and services as an expectation, and to consider housing as a function of case management.

**HOPWA**

### EMPLOYMENT

1. Increase employment opportunities for people living with HIV/AIDS.

### EVALUATION

1. Use performance measurements for setting priorities and allocating funds.
2. Expand participation in AIDS Housing Advisory Committee.

### GEOGRAPHIC SERVICE AREAS (INCLUDING AREAS OF LOW-INCOME FAMILIES AND/OR RACIAL MINORITY CONCENTRATION)

The Portland Eligible Metropolitan Statistical Area includes Clackamas, Washington, Multnomah, Yamhill, and Columbia Counties in Oregon, and Clark and Skamania Counties in Washington.

### MONITORING

A description of PHB's Monitoring program is in Section One.
