

## **RDPO Regional Strategic Goals and Priorities 2014-2016**

| Goals   | Priority Objectives  | Key Activities  Already in Progress  |
|---|--|--|
| Enhance and sustain the region's capability to engage the whole community in all hazards disaster preparedness.  Supporting effective regional collaboration on risk management; setting preparedness capability targets and strategic goals/priorities; making regional investment choices; implementing projects and initiatives; and evaluating preparedness results/impact. | Continue developing the RDPO organization and its resource base  | 1) Finalize a formal partners' agreement; 2) Secure financial commitments from select RDPO partners; 3) Secure other local, State and Federal funds, as available; 3) Establish new task forces and support other organizational changes that align the organization to complete the 2014-2016 work plan, including bringing on board new partners   |
|   | Expand the use of capability-based planning in the region utilizing the National Preparedness System's tools (e.g., THIRA)                   | 1) Review and update the list of regional threats and hazards; 2) refine the impacts for our top planning scenarios; 3) refine desired outcomes and targets for our capabilities; 4) assess resource needs, resources in place and gaps more accurately (and more systematically); 5) identify mitigation strategies and potential solutions, including legislative or advocacy opportunities; 6) and enhance/expand whole community engagement (add'l partners)   |
|   | Complete the 2014-2016 Strategic<br>Plan and lay the foundation for<br>longer-term strategic regional<br>preparedness planning               | 1) Gain Policy Committee support for RDPO three-year priorities proposed by the Steering and Program Committee; 2) complete all other steps to completing the plan and have it approved by Spring 2014; 3) conduct research and assessments, as well as apply the results of our THIRA work, and build new partnerships to lay the foundation for long-term planning   |
| Improve regional capacity and readiness to mount coordinated multi-discipline, multi-agency disaster response and recovery operations (including incident and scare resource prioritization, policy development, and public message standardization during major multi-jurisdictional emergencies and disasters)  | Complete the development/establishment of the Regional MACS System   | 1) Complete the Regional MACS ConOps plan; 2) stand-up and train the MAC Group (MACG) and Support Organization (MSO); 3) integrate single discipline MACGs (Health/Medical, Public Health, Animal Services, and PIO) and the Regional Logistics Support Team (RLST) into the Regional MACS; update all associated plans, agreements and concepts of operation to align with the MACS ConOps; 4) educate/orient stakeholders throughout the region; 5) exercise the MACS ConOps (e.g., tabletop exercises); 5) continue to refine regional equipment tracking systems |
| Increase community resilience<br>for major<br>emergencies/disasters   | Develop and sustain a regional disaster preparedness messaging and outreach program  | Key strategies and activities still under development  Criteria for Selecting Priorities:  Long-Term Value to region/multiple local partners  Addresses an important gap/need; builds on and/or helps sustain existing capabilities (or components)  |
| Enhance the region's intelligence and information-sharing capability to help prevent/mitigate terrorist events, as well as to ensure accurate risk and threat assessments for our region  | Achieve improvements in the regionally-based TITAN Fusion Center's information-sharing and outreach practices with key regional stakeholders | Law Enforcement Work group is spearheading this initiative and will develop the work plan.  Urgency/Potential high consequence or risk if we do not prioritize this capability or initiative  Capacity and/or resources exist to complete and sustain the initiative  A regional champion (individual or group) identified to organize and lead the effort   |
| Enhance situational assessment capability in the region (Capacity of Emergency Operations Centers, Emergency Coordination Centers and Department Operations Centers to deliver decision-relevant information in a timely manner during  | Finalize the establishment of a sustainable Regional WebEOC System   | 1) expand current governance structure to include steering committee (for strategic direction/policy-setting); 2) develop regional SOPs and "boards"; 3) secure technology enhancements (e.g., GIS); 4) develop partners' cost share agreement; 5) improve regional-state interface; 6) continue developing capacity of users around the region  |

emergencies.)

## **Key Activities** Goals **Priority Objectives** Already in Progress Create an effective local and Complete the current phase of regional 1) Clarify jurisdictional authorities/roles/responsibilities of key partners: 2) develop regional disaster debris regionally coordinated disaster debris management planning management planning framework; 3) develop/provide tools and technical assistance to local jurisdictions to help them and support on-going informationdisaster debris management complete their disaster debris management plans; 4) conduct a TTX of the regional planning framework; 5) task force sharing and networking of the task response system plans next steps, including closing the gap between city and county plans. (from Spring 2014 onward) force and wider stakeholder group Enhance regional medical Complete the regional alternate care Alternate Sites Task Force is currently revising their work plan, but expects the framework to be completed by spring 2014. surge (mass casualty) sites concept of operation interfacing response coordination Casualty Collection Points (Fire/EMS) and Alternate Care Facilities capability (Hospitals) Complete regionally coordinated Work plan to be developed; NW Oregon Health Preparedness Organization is the lead. medical surge plans New Priorities: Tier I Increase the region's capability to Strengthen governance and Enhance the region's ability to mount a well-coordinated mass coordination of regional alert assure fuel for priority care and sheltering response in a and early warning systems emergency response operations major emergency/disaster including people and pets) Develop a regional fuel Conduct assessments of Develop a regional mass care contingency plan equipment and review and sheltering plan ownership, roles and responsibilities **New Priorities: Tier II** Increase the region's Enhance the region's capability Establish a common regional capability to mount a wellto effectively manage human system for assessing damage coordinated donations resources in major impacts in a disaster emergencies/disasters management response in a major emergency/disaster Begin to develop a regional Create a regional system for Develop Stranded (a.k.a Shared) damage assessment planning Develop a donations managing spontaneous Workers Agreements across the framework management plan volunteers during disasters Region
