

Heritage Trees of Portland

CALIFORNIA BUCKEYE (*Aesculus californica*) SAPINDACEAE

- Native to California.
- Usually does not exceed 30' in height.
- 5 leaflets making a leaf shaped like a palm.
- Flowers white/pink in clusters up to 10" long from May to August.
- In dry summer tree can have leaf drop by September.
- Rare in Portland. The seed for #196 was collected in California by Lambert Florin, a writer about the West, and planted at his Portland home on SE Tolman.

196 California buckeye (*Aesculus californica*)

5527 SE Tolman*

H 18, S 22.3, C 3.2

257 California buckeye (*Aesculus californica*)

8827 N. Haven

H 30, S 48, C 8.8
