

Heritage Trees of Portland

CEDAR OF LEBANON (*Cedrus libani* ssp. *libani*) PINACEAE

- Native to mountains of Turkey, Syria, Lebanon.
- Can reach over 120' in height.
- Needles longer and less lush than Atlas cedar. Color is light green (new growth) to dark green (old growth).
- Female cones are larger than Atlas; there are fewer on tree.
- Branching more layered than other *Cedrus* species.
- Very rare in Portland. #6 was probably planted sometime in the late 19th century by Henry Miller, one of Portland's first florists.

6 Cedar of Lebanon (*Cedrus libani* ssp. *libani*)

SW 20th & Jefferson*

H 85, S 79, C 15.4
