

Heritage Trees of Portland

CHINA FIR (*Cunninghamia lanceolata*) CUPRESSACEAE

- Native to China.
- In wild can exceed 100'.
- Needles are very sharp and 2-ranked along stem; entire branches can turn brown making it look unhealthy.
- Cones about 1.5" long, prickly, grow in clusters.
- Often multi-trunked.
- Not common in Portland.

57 China fir (*Cunninghamia lanceolata*)
