

Heritage Trees of Portland

JAPANESE PAGODA TREE (*Styphnolobium japonica*) FABACEAE

- Native to China, Korea, Vietnam (not Japan).
- Height can approach 100'.
- Leaves compound, 7-17 leaflets each with pointed tips.
- Flowers pea-like, large creamy-white clusters (8-12" long); occur in late August, usually every other year; pod bright green, 3-4" long.
- Uncommon in Portland. #149 was planted around 1910.
