

Heritage Trees of Portland

AMERICAN ELM (*Ulmus americana*) ULMACEAE

- Native to central and eastern North America.
- Height can reach 160' but usually <100'.
- Leaves 3-6" long, doubly toothed, base unequal, dark green, shiny, smooth or rough above, hairy or smooth below.
- Flowers small, in drooping clusters, appear before leaves. Winged seeds 0.5" long with hairs along edge.
- Shape of tree is distinctive: trunk and limbs vase-shaped leading to a rounded crown with arching branches.
- Common in Portland (threatened by Dutch elm disease).
- #1 was planted in front of the home of Martin and Rosetta Burrell in 1870.

1 American elm (*Ulmus americana*)
