

PROPOSED WORK AREAS

AREA 1: Connect pipe in SE Lincoln Street to 42-inch diameter pipe outside the park (not part of the Land Use Review).

AREA 2: Construct a 48-inch diameter pipe entering the park at SE Lincoln Street, crossing the field and NW corner of the dog park, and re-entering street at SE Lincoln Drive.

AREA 3: Construct a 48-inch diameter pipe under SE Lincoln Drive along with a vault with two (2) manholes in the roadway, and install two (2) small electrical conduits.

AREA 4: Five (5) cut and plugs, make a 30-inch diameter pipe connection, and install two (2) small electrical conduits.

AREA 5: Three (3) cut and plugs, install a 48-inch diameter pipe connecting two pipelines, removal of existing vault, and construction of a new aboveground vault.

AREA 6: Two (2) cut and plugs, install an air vent, and potential installation of a backflow preventer.

AREA 7: Three (3) cut and plugs and install a corrosion prevention system with aboveground cabinet, several small underground utility vaults, and electrical conduit.

AREA 8: Two (2) cut and plugs on Reservoir 6 outlet pipes and the install of electrical cabinet. All work will occur adjacent to the SE 60th Avenue right-of-way.

AREA 9: Cap pipe ends, cover weir opening, and add screens to pipes that will remain in use in Reservoir 1.

AREA 10: Cap pipe ends and add screens to a weir and pipes that will remain in use in Reservoir 5.

AREA 11: Install an emergency generator in the east side gatehouse and cap or screen pipe ends that will remain in use in Reservoir 6.

PROPOSED PROJECT

In order to satisfy an unfunded federal water quality mandate, the City of Portland is required to disconnect Portland's open air reservoirs, including three at Mt. Tabor Park. This work is scheduled to begin in early 2015. Reservoir 7, which is enclosed at Mt. Tabor Park, will stay in service. None of this work will damage or make non-reversible alterations to the open reservoirs or other historic structures.

REVIEWING WORK: In 2014, the proposed project will undergo an administrative land use review by the City's Bureau of Development Services. The project will follow a Type 3 land use review process. This project has two Land Use Reviews – Historic Resource and Environmental – which will be consolidated into one application package and will be heard together by the Historic Landmarks Commission. The reviews will include a public hearing, public notices, and opportunities for public comment.

GET INVOLVED: We are committed to meaningful public involvement as an essential element of this proposed project. For partnership and feedback opportunities, including guided walking tours, visit www.portlandoregon.gov/water/mttabor.

FUTURE OF MT. TABOR RESERVOIR SITES: The community conversation to develop a plan for the long-term future of this part of Mt. Tabor park will be led by Portland Parks & Recreation Commissioner Amanda Fritz. Send your feedback to Commissioner Fritz's Office at Amanda@portlandoregon.gov.

ADDITIONAL QUESTIONS: For more additional information on the proposed Mt. Tabor Reservoir Project, visit www.portlandoregon.gov/water/mttabor.
