Applying for a New Single Family Residential Project and Sample Fees

The Bureau of Development Services (BDS) accepts New Single Family Residential (NSFR) and new construction Accessory Dwelling Unit (ADU) projects for review through three different intake processes:

- For one or two dwelling unit projects, you will either:
  - Submit your plans through the NSFR Submittal and Review Process via the Development Services Center (DSC), or
  - Submit your plans through the Drop Off Process for NSFR Submittals.
- For three or more dwelling units (designed to the Oregon Residential Specialty Code) on a single lot or attached to each other, you will submit your plans through the Batch Submittal and Review Process.

If you wish to include the mechanical, electrical, and plumbing trade work permits on NSFR projects, please complete and have signed, each of the trade permit applications at the time of NSFR application.

If you are unsure how your project should be processed, or if you have questions about the information necessary to submit, please call Permitting Services at 503-823-7357.

NSFR Submittal and Review Process – for projects of one or two units

1. Prepare and bring the items noted below to the DSC. Hours of operation are available on our website (www.portlandoregon.gov/bds/dsc) or by calling 503-823-7310. We will assist NSFR customers up to one hour before the conclusion of business for the day.
   - Completed NSFR Application Packet
   - Four sets of complete plans with an additional 11X17 Site Plan.*
   - Complete submittal materials per NSFR Minimum Submittal Checklist included in application packet.

2. Meet with a Technician in the DSC to check the completeness of your NSFR application packet and plans. Application packets and plans must be deemed complete to be Approved for Intake.

3. Plans and application materials which are Approved for Intake will have intake fees generated and billed. Following intake fee payment, the NSFR will be Under Review.

Batch Submittal and Review Process – for projects of three or more units

Projects which include three or more structures built to the Oregon Residential Specialty Code, or International Residential Code, and are located on a single tax lot or attached to each other, are submitted through the Batch Submittal Process. Examples of Batch Submittal projects could include three townhouse units, or three or more single-family homes on one tax lot.

These projects necessitate Batch Submittal processing due to their unique Planning and Zoning requirements, which differ from those for standard single-family development. In addition, projects involving multiple structures on one tax lot require a separate Site Development permit for the common infrastructure elements such as driveways, utilities, and landscaping.

1. Prepare and bring the following items to Permitting Services located on the 2nd floor of the 1900 SW Fourth Avenue building. Hours of operation are available on our website (www.portlandoregon.gov/bds/dsc) or by calling 503-823-7310.
   - Completed Batch Intake Worksheet and NSFR Application packet (including information for each building type)
   - 4 sets of complete plans
   - Any additional submittal materials* * (see NSFR Minimum Submittal Checklist)

2. A Process Manager will be assigned to your project. Within one week, Applicants will be notified, by email, about the status of their submittal. If deemed complete, intake fees will be identified. Following intake fee payment the NSFR will be Under Review. If deficient, information on how to proceed will be identified.
