In September 2018 BDS created The Property Compliance Division. One focus of this new division is inspecting and enforcing Portland's Title 10 erosion and sediment control regulations for residential construction sites. This change shines a new light on not-so-new regulations and how they are implemented and enforced in development projects throughout the City.

Topics to be discussed:

- Why is erosion and sediment control required
- Basics of erosion and sediment control best management practice installation and maintenance
- Changes in inspection request sequencing
- How to prepare for erosion control inspections

REGISTRATION IS NOT REQUIRED

Presented by the Bureau of Development Services.
