Chapter 16: Rooftop Equipment Using Friction to Retain in Place - UBC/16/#4

Rescinded
July 13, 2016

Reason for rescindment: The information in this code guide is based on the Oregon Structural Specialty Code (OSSC), 1998 Edition. The OSSC was update in 2014. As such, the information in this code guide is outdated. The OSSC 2014 edition adequately address structural requirements for anchorage of rooftop equipment.

Current information on this topic can be found in chapter 13 of ASCE 7-10 as amended by the Oregon Structural Specialty Code (OSSC).
