

PERSONAL WIRELESS SERVICE FACILITIES
LAND USE REVIEW FEE SCHEDULE

Beginning January 14, 2019, the Bureau of Development Services will process land use reviews for Personal Wireless Service Facilities according to the table below. Pre-application conferences are no longer required. However, applicants are strongly encouraged to explore voluntary early assistance options before applying for a land use review.

Table with 3 columns: Procedure Type, Proposals Reviewed by Procedure Type, and Submittal Fee*. It lists various review types (Adjustment, Conditional Use, Design, Environmental, Greenway, Historic Resource, Modification, River) for Type I and Type II procedures with their respective fees.

*Please note that the land use review submittal fees are based on estimated staff time to process each type of review. Very complex proposals may require additional staff time beyond the estimated hours and applicants will be required to pay for these additional hours before their building permit can be issued.
