Comprehensive Plan Map Amendment Approval Criteria

Land Use Review Application Packet Check List

About Comprehensive Plan Map Amendments:

Comprehensive Plan Map Amendments change the way the City's Comprehensive Plan goals and policies are applied to a site and must meet all approval criteria in Chapter 33.810. Requests for zoning map amendments may be considered concurrently with a Comprehensive Plan Map amendment. Zoning map amendments must be to a zone corresponding to the requested Comprehensive Plan Map designation. Concurrent zoning map amendments must meet all the approval criteria of Chapter 33.855, Zoning Map Amendments.

Comprehensive Plan Map Amendment Procedure:

Requests for a Comprehensive Plan Map amendment follow a Type III procedure, with the exception that the Hearings Officer makes a recommendation to City Council. (A summary of the Type III procedure is included in your application materials.) City Council makes the final decision on Comprehensive Plan Map amendments. There is no local appeal of City Council's decision.

How to Address the Approval Criteria:

The burden of proof is upon you to show how your request meets the approval criteria that are listed below. You will need to submit a separate written narrative in which you address the relevant policies and objectives of the Comprehensive Plan, as well as the other approval criteria. Use the approval criteria as an outline so that anyone who reads your written narrative can find where you addressed each approval criteria.

Approval Criteria for Comprehensive Plan Map Amendments - 33.810.050:

Quasi-Judicial. Amendments to the Comprehensive Plan Map that are quasi-judicial will be approved if the review body finds that the applicant has shown that all of the following criteria are met:

1. The requested designation for the site has been evaluated against relevant Comprehensive Plan policies and on balance has been found to be equally or more supportive of the Comprehensive Plan as a whole than the old designation;
2. When the requested amendment is:
 - From a residential Comprehensive Plan Map designation to a commercial, employment, industrial, or institutional campus Comprehensive Plan Map designation; or
 - From the urban commercial Comprehensive Plan Map designation with CM zoning to another commercial, employment, industrial, or institutional campus Comprehensive Plan Map designation;

The requested change will not result in a net loss of potential housing units. The number of potential housing units lost may not be greater than the potential housing units gained. The method for calculating potential housing units is specified in subparagraph A.2.a, below; potential housing units may be gained as specified in subparagraph A.2.b, below.

- a. Calculating potential housing units. To calculate potential housing units, the maximum density allowed by the zone is used. In zones where density is regulated by floor area ratios, a standard of 900 square feet per unit is used in the calculation and the maximum floor area ratio is used. Exceptions are:
 - (1) In the RX zone, 20 percent of allowed floor area is not included;
 - (2) In the R3, R2, and R1 zones, the amenity bonus provisions are not included; and
 - (3) In the CM zone, one half of the maximum FAR is used.
 - (4) Where a residentially zoned area is being used by an institution and the zone change is to the Institutional Residential zone, the area in use as part of the institution is not included.
 - (5) Where a residentially zoned area is controlled by an institution and the zone change is to the Institutional Residential zone the area excluded by this provision also includes those areas within the boundaries of an approved current conditional use permit or master plan.

-
- b.** Gaining potential housing units. Potential housing units may be gained through any of the following means:
 - (1) Rezoning and redesignating land off site from a commercial, employment, or industrial designation to residential;
 - (2) Rezoning and redesignating lower-density residential land off site to higher-density residential land;
 - (3) Rezoning land on or off site to the CM zone;
 - (4) Building residential units on the site or in a commercial or employment zone off site. When this option is used to mitigate for lost housing potential in an RX, RH, or R1 zone, only the number of units required by the minimum density regulations of the zone are required to be built to mitigate for the lost housing potential; or
 - (5) Any other method that results in no net loss of potential housing units, including units from the housing pool as stated in 33.810.060 below.
 - (6) In commercial and employment zones, residential units that are required, such as by a housing requirement of a plan district, are not credited as mitigating for the loss of potential units.
 - (7) When housing units in commercial or employment zones are used to mitigate for lost housing potential, a covenant must be included that guarantees that the site will remain in housing for the credited number of units for at least 25 years.
 - 3.** When the requested amendment is from an Industrial Sanctuary or Mixed Employment Comprehensive Plan Map designation to any other designation, in order to prevent the displacement of industrial and employment uses and preserve land primarily for these uses, the following criteria must also be met:
 - a.** The uses allowed by the proposed designation will not have significant adverse effects on industrial and employment uses in the area or compromise the area's overall industrial character;
 - b.** The transportation system is capable of safely supporting the uses allowed by the proposed designation in addition to the existing uses in the area. Evaluation factors include street capacity and level of service, truck circulation, access to arterials, transit availability, on-street parking impacts, site access requirements, neighborhood impacts, and pedestrian and bicycle circulation and safety;
 - c.** The uses allowed by the proposed designation will not significantly interfere with industrial use of the transportation system in the area, including truck, rail, air, and marine facilities;
 - d.** The site does not have direct access to special industrial services such as multi-modal freight movement facilities;
 - e.** The proposed designation will preserve the physical continuity of the area designated as Industrial Sanctuary or Mixed Employment and not result in a discontinuous zoning pattern.
 - f.** The uses allowed by the proposed designation will not reduce the ability of Portland's Central City, Regional or Town Centers to attract or retain the principal retail, cultural, and civic facilities;
 - g.** The size of the area that may be given a new Comprehensive Plan Map designation is as follows:
 - (1) If the site is designated Industrial Sanctuary, and Metro also has designated the site as part of a Regionally Significant Industrial Area, no more than 10 acres may be given a new Comprehensive Plan Map designation;
 - (2) If the site is designated Industrial Sanctuary, and Metro has designated the site as an Industrial Area, but not as part of a Regionally Significant Industrial Area, no more than 20 acres may be given a new Comprehensive Plan Map designation;
 - (3) If the site is designated Industrial Sanctuary, and Metro has designated the site as an Employment Area, no more than 40 acres may be given a new Comprehensive Plan map designation;
 - (4) If the site is designated Mixed Employment, no more than 40 acres may be given a new Comprehensive Plan Map designation.
 - (5) Exception: If the site is not designated as industrial or employment by Metro, these size limits do not apply.
