

Searching for all Permits on a Property

Searching for all permits related to a property is a future function in AMANDA. The steps in this guide provide an alternative way to accomplish the task using a different system, Portland Maps.

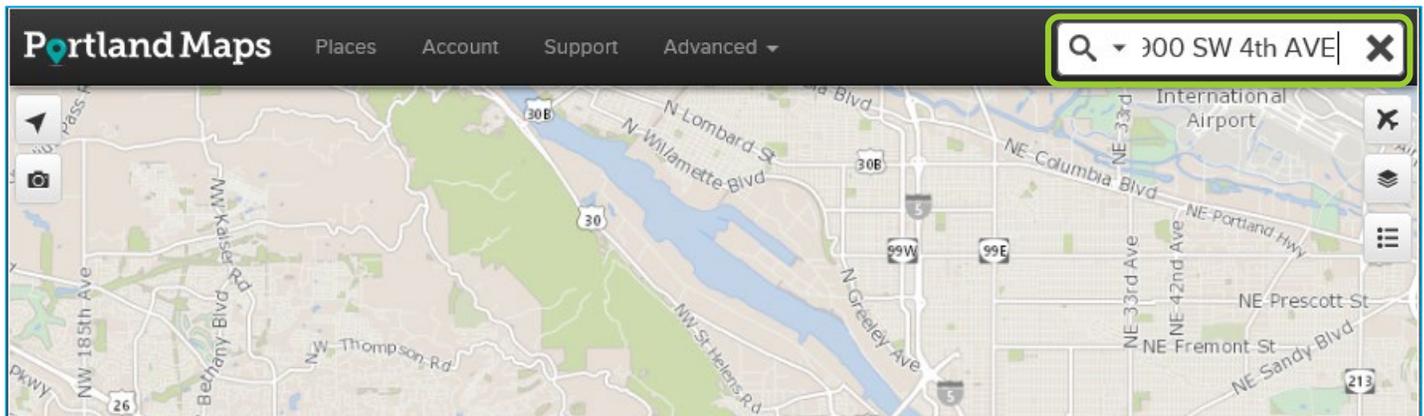

FINDING PERMITS IN PORTLAND MAPS

1. Click the **Portland Maps shortcut** on the desktop.

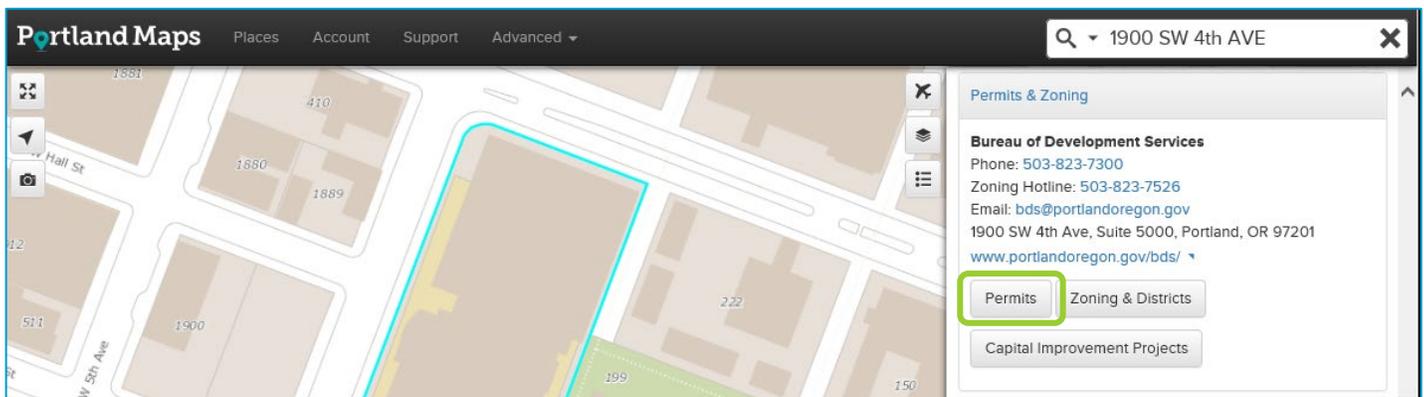

2. Portland Maps opens in a browser. Type the **property address** in the search field and press **Enter**.

Tip: If a search is unsuccessful, try entering only the building number and street. Alternately, search by intersection (for example, SW Harrison & SW 4th), and then click the correct property on the map.

3. Portland Maps locates the address and opens a property summary. Click the **Permits button**.

Tip: For condominiums, select the condominium number in the Related Accounts bar at the bottom of the property summary.

- A list of all permits associated with the property from year 2000 to present opens. Scroll down to see the entire list. Click an **application number** to view a permit.
