DESIGN ADVICE REQUEST PROCESS OVERVIEW

Purpose

Design Advice Requests (DARs) are a form of early assistance intended to provide a public forum for the preliminary discussion and exchange of information between the applicant, BDS staff, the public, and the representative Commission. The feedback that results from a DAR is advisory and preliminary in nature. The DAR is not a land use review and decisions are not made in the DAR process.

An applicant may request advice from the Design Commission or Historic Landmarks Commission prior to submitting a land use review. In some cases, a DAR may be required by a provision of the Zoning Code. These requests do not substitute for required prescribed regulatory or legislative processes.

Public Participation

The public meeting with the Commission will provide an opportunity for parties to submit oral and written comment. The Commission relies on Portlanders to bring their perspective on their community. Portland has a strong design legacy that continues through this process. The public's early input on significant projects helps to make sure we get this right. Continued participation through the land use review is necessary for public comments to be part of the land use review record.

Meeting Order

The order of appearance for those attending the meeting is as follows:

- BDS Staff Introduction
- Applicant Presentation
- City Staff Discussion Topics
- Public Comments
- Commission and Applicant Discussion

Guiding Criteria

Design Guidelines are used to guide the conversation during the DAR because they are the approval criteria used in the subsequent land use review. All feedback should relate to the concept's response to the Guidelines. Copies of the Design Guidelines are available online at portlandoregon.gov/designguidelines.

Outside DAR Scope

The Commissions only have the authority to influence elements of a project that relate to the approval criteria. For example, guidelines do not address private views. Here other resources for questions on issues that the Commissions cannot address:
