

Fanno Creek Watershed

working for clean rivers

SW 45th Avenue Culvert Replacement Road Closure Starts August 23

AUGUST 9, 2017

CONTACT: Debbie Caselton, 503-823-2831
Debbie.Caselton@portlandoregon.gov

Environmental Services will be constructing a project to replace an aging culvert on Fanno Creek at SW 45th Avenue. The new larger culvert will improve stream flow and allow fish to pass through. Two green street planters will also be constructed along SW 45th to capture and filter stormwater runoff before it flows into Fanno Creek. The restoration work and fish passage will continue Environmental Services efforts to improve conditions in Fanno Creek.

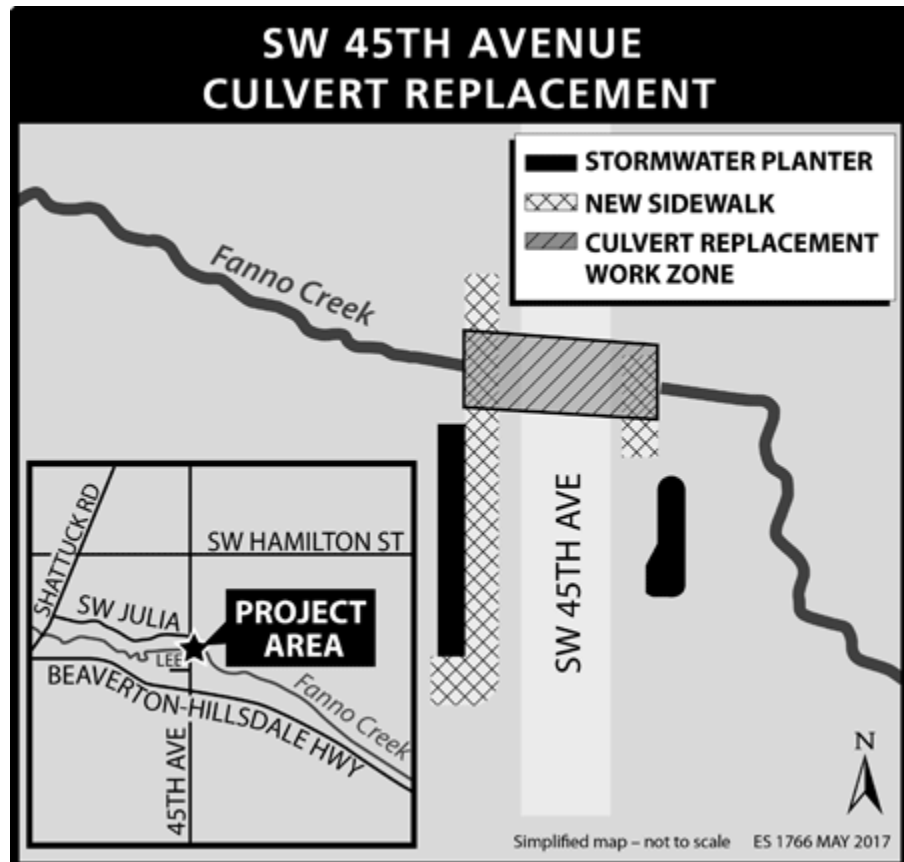

Road Closure

SW 45th Avenue will be closed all hours and all days for one continuous period beginning August 23 until October 4 to remove and install the new culvert. The actual work in the creek will be completed by the end of September in the required in-water work window.

The closure will be on SW 45th between SW Lee and the Woods Apartments (4940-4950 SW 45th). The recommended auto and bike detour is SW Shattuck Road and Hamilton Street.

Pedestrian Access

There is a pedestrian trail at SW 45th across from Julia Street that will bring you to SW 43rd and Beaverton-Hillsdale Highway. An aerial photo is on the project website at www.portlandoregon.gov/bes/SW45thCulvert.

ENVIRONMENTAL SERVICES
CITY OF PORTLAND

working for clean rivers

Stormwater runoff can impact water quality in rivers and streams. Portland uses green streets, ecoroofs, trees and other green infrastructure to increase sewer system efficiency, and protect water quality, public health, and the environment.

Green infrastructure keeps stormwater out of the sewer system, filters pollutants, provides habitat and increases neighborhood green space for healthier watersheds. Learn more at www.portlandoregon.gov/bes.

What to Expect During Construction

- Construction creates noise, vibration and dust and disrupts normal neighborhood activity.
- Local access to all properties will be maintained, but construction activities may impact normal use of your driveway.
- You should expect traffic delays in and near the work area. Please observe traffic control signs and follow the directions of flaggers.
- On-street parking will be restricted in and near the work zones to create a safe work environment and to stage equipment and materials.
- Some equipment and materials may be stored on your street or nearby streets overnight.
- There may be periods of inactivity between construction phases due to a variety of factors including weather, subcontractor schedules, and availability of materials.
- A city inspector will be on-site during work hours and may be able to assist you with an immediate need during construction.
- Sewer, water, and other utilities will remain in service during construction.

Stay Informed

We encourage you to sign up for email updates about the project schedule and activities and by visiting the project webpage at www.portlandoregon.gov/bes/SW45thCulvert and click the SIGN UP! button. If you would like more information about the project or have questions and concerns you'd like to discuss, please call Debbie Caselton at 503-823-2831 or email at Debbie.Caselton@portlandoregon.gov. Please include your name, property address and project name (SW 45th) in your voicemail and email so we can provide you more details about what to expect in front of your property. Also, please write "SW 45th" in the subject line of your email.
