*By signing this certification, the undersigned confirms that the required BMPs found in the Asbestos Abatement and Demolition Wastewater Discharge Authorization were followed in the previous year.*

#### **Required Best Management Practices (BMPs):**

The discharge of any demolition wastewater to the storm sewer system is strictly prohibited. Storm drains located within the work zone shall be isolated, and all demolition wastewater shall be collected and discharged to either an on-site sanitary sewer system or transported off site for disposal to an appropriate sanitary sewer system.

Demolition wastewater shall be contained on site and not be permitted to discharge to a street inlet. No demolition wastewater shall enter the public right-of-way.

A log shall be maintained detailing discharges of wastewater to the sanitary sewer system. At a minimum the discharger shall record the following information in the log; discharge date, site address, volume of wastewater, type of filtration utilized, and name of person conducting the discharge.

Wastewater generated during demolition must be collected and treated through a 5-micron, nominally-rated filtration system, prior to discharge to the City sanitary/combined sewer.

Employees shall be properly trained in the conditions of this Discharge Authorization.

#### **Certification:**

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
