Best Management Practices (BMP) Compliance

Did the facility follow all of the Mobile Washer BMPs required in its Discharge Authorization?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
If the answer above was no, please explain:		
<hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/>		

General Best Management Practices (BMPs):

- This Discharge Authorization applies only to exterior surface washing.
- Wash water discharges associated with internal compartment washing (tanks, tankers, etc.) are not permitted under this Discharge Authorization.
- Wash water discharges associated with internal washing of drums, totes, or containers used to store commercial product or process wastes are not permitted under this Discharge Authorization.
- Wash water discharges associated with exterior coating removal (e.g. paint stripping) are not permitted under this Discharge Authorization.
- A site-specific work plan (Attachment A), documenting the measures taken to prevent pollutants from entering the storm drain system, shall be maintained in service vehicles performing washing operations along with a copy of the site drainage map and the Mobile Washer Discharge Authorization.
- All mobile washing activity must be performed on the customer's property/site. Wash water shall be contained on site and not be permitted to discharge to a street inlet. No washing shall be conducted in the public right-of-way.

Ph: 503-823-5600 Fax: 503-823-5656 ■ www.portlandoregon.gov/bes ■ Using recycled paper ■ An Equal Opportunity Employer

The City of Portland complies with all non-discrimination laws including Title VI (Civil Rights) and Title II (ADA).

To request a translation, accommodation or additional information, please call 503-823-7740, or use City TTY 503-823-6868, or Oregon Relay Service: 711.

- The wash area must be washed down after use and the water collected and discharge to the sanitary or combined sewer system. No soap residue may remain on the site.
- Wastewater containing fats, oils, and grease (FOG), polar and non-polar must be treated through an approved grease removal device, prior to discharge to the sanitary sewer.
- Mobile washing activity conducted at jobsites where stormwater management is regulated under a control mechanism, such as a National Pollution Discharge Elimination System (NPDES) permit or a No Exposure Certification (NEC), must adhere to the requirements of the facility's Storm Water Pollution Control Plan (SWPCP) if applicable.
- The pH of the discharge must be within 5.0 and 11.5. This shall be verified by on-site monitoring prior to discharge using pH test strips or portable pH tester.
- The rate of discharge shall not exceed 50 gallons/minute.

Certification:

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
