

Create a Team

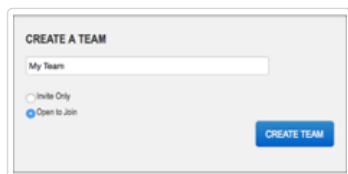

1 Create A Team

Click Create A Team.

2 Adjust Team Settings

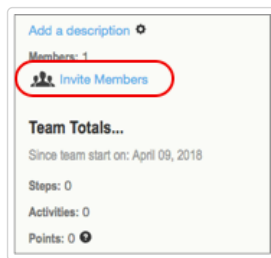

If you want control over who can join your team, make sure that it is set to Public and Invite Only. This way the team is searchable but you still are able to control who joins.

(availability varies depending on your administrator's preference)

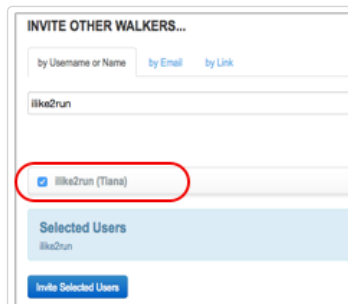

3 Invite Members

Click on Invite Members (the team creator or team captain is the only one who can do this).

4 Invite Other Walkers

Scroll down and find "Invite Other Walkers". Search for them by username, email or link. Make sure to select the user and then click Invite Selected Users.

5 Members Invited

At the top of the screen you will see that your members have been invited. Members will receive a notice of being added when they log into their Walker Tracker account and also in their email.
