Map 580-3 Pedestrian Mall and Open Area Landscaping

33.580.010 Purpose
The South Auditorium plan district protects the unique character of the former South Auditorium urban renewal district. The district is an award-winning development, with its high-rise buildings, generous setbacks and landscaping, numerous plazas and fountains, and elaborate pedestrian walkway system. Maintenance of this character is achieved by requiring additional landscaping requirements, the preservation of existing trees, screening of roof-top equipment, and additional sign regulations which limit the type, number, and size of signs.

33.580.020 Where the Regulations Apply
The regulations of this chapter apply to development in the South Auditorium plan district, as shown on Map 580-1 at the end of this chapter, and on the Official Zoning Maps. Where the regulations of this chapter conflict with the regulations of the Central City plan district, the regulations of this chapter prevail.

33.580.030 Required Design Review
The regulations of Chapter 33.420, Design Overlay Zones apply in all areas of the plan district that are within the Design Overlay Zone.

33.580.040 Portland Development Commission
Due to their involvement in the development of the plan district, the participation of the Portland Development Commission (PDC) is actively encouraged. The PDC will be notified of all pre-application conferences and their advice sought before any final staff recommendations are made on a land use review.
Development Standards

33.580.100 Floor Area Ratios
Maximum floor area ratios for sites in the South Auditorium plan district are shown on Map 580-2. In the portion of the South Auditorium plan district that is also in the Central City plan district, the Central City floor area bonus and transfer options apply rather than any base zone bonus or transfer options.

33.580.110 Landscaped Areas
At a minimum, new development and modifications to existing development must meet the landscape standards stated in this section. The standards do not apply to parking lots, which are subject to the standards in 33.580.120 below. These standards are minimums; the review body may require higher standards as part of a land use review. The standards are:

A. Fourth Avenue. A 6 foot deep area landscaped to at least the L2 standard is required along SW Fourth Avenue. The landscape standards are stated in Chapter 33.248, Landscaping and Screening.

B. Other streets. A 15 foot deep area landscaped to at least the L1 standard is required along any public street other than SW Fourth Avenue.

C. Pedestrian malls/open space. A 6 foot deep area landscaped to at least the L1 standard is required along lot lines abutting a pedestrian mall or open space designated in the Central City Plan or the Comprehensive Plan.

33.580.120 Parking Lot Landscaping
The perimeter of surface parking lots which abut pedestrian malls or rights-of-way must have a 5 foot deep area landscaped to at least the L2 standard. In addition, the interior landscaping of surface parking lots must have at least 1 tree for each 500 square feet of paved area. These standards are minimums; the review body may require higher standards as part of a land use review.

33.580.130 Preservation of Existing Trees
A. Existing trees must be preserved. Unless exempt under subsection B, removal of existing trees 6 or more inches in diameter is allowed only when approved through design review, using the following approval criteria:

1. The location of the tree to be removed is needed for development of a new building or an arborist finds that the tree will be affected by proposed development in a manner that is likely to cause significant damage or death to the tree;

2. The proposal is consistent with the purpose of the plan district; and

3. Each tree removed will be replaced with a new tree elsewhere in the plan district in accordance with the adopted landscaping plan for the plan district, or as determined by the design review.
B. **Exemption.** Removal of trees that are dead, dying, or dangerous, as determined by an arborist, is exempt from the requirement for design review if the tree is replaced by at least one tree in the same general location or in accordance with the adopted landscaping plan for the plan district.

C. **Tree removal without development.** When no development is proposed, removal of trees allowed under the exemption in Subsection B, above, is subject to the tree permit requirements of Title 11, Trees.

### 33.580.140 Sign Restrictions
The sign standards are stated in Title 32, Signs and Related Regulations.

### 33.580.150 Roof Top Screening
All mechanical equipment, duct work, and structures that house mechanical equipment on a roof must be hidden by sight-obscuring screening. Satellite dishes on a roof require screening, unless the review body finds that the dish design is consistent with the design guidelines.
