33.653 Stormwater Management

Sections:
33.653.010 Purpose
33.653.020 Stormwater Management Approval Criteria
33.653.030 Stormwater Management Approval Standards
33.653.040 Environmental Overlay Zones

33.653.010 Purpose
These regulations provide for the efficient and flexible placement of stormwater facilities serving a variety of development configurations. The standards and criteria of this chapter recognize that on-site stormwater facilities may be land intensive and site specific, consequently affecting the arrangement of lots and streets. These regulations ensure that the land division site has an adequate area and an appropriate location for stormwater facilities. The approval criteria ensure that it is feasible to develop a stormwater system that will have adequate capacity for the developed site.

33.653.020 Stormwater Management Approval Criteria
Stormwater management must meet the following approval criteria:

A. If a stormwater tract is proposed or required, an adequate amount of land and an appropriate location must be designated on the Preliminary Plan; and

B. The application must show that a stormwater management system can be designed that will provide adequate capacity for the expected amount of stormwater.

33.653.030 Stormwater Management Standards
Stormwater management facilities must meet the following standards. Adjustments are prohibited.

A. The Bureau of Environmental Services has preliminarily approved the capacity, type, location, feasibility and land area required of the proposed stormwater management system and stormwater disposal facilities as well as any connection to off-site facilities. The approval is based on the Sewer Design Manual and the Stormwater Management Manual;

B. The Bureau of Development Services has preliminarily approved the capacity, type, location, feasibility, and land area required of any proposed private on-site stormwater disposal facilities; and

C. Ownership and maintenance.

1. Generally, a stormwater facility that serves more than one lot must be in a tract or within the right-of-way; except as allowed by C.2 below. If the facility is in a tract, it must be either owned in common by all of the owners of the lots served by the facility, by a Homeowners’ Association, by a public agency, or by a non-profit organization.
2. Exceptions.
   a. A private stormwater facility may be in an easement if the location of the tract
      would preclude compliance with the front lot line requirements of Chapters
      33.610 through 33.615;
   b. An existing private stormwater facility may be in an easement, if there is a
      recorded maintenance agreement, or if the maintenance is addressed in
      the CC&Rs;
   c. A private stormwater facility serving up to five dwelling units may be in an
      easement, if there is a recorded maintenance agreement, or if the maintenance
      is addressed in the CC&Rs.

D. Driveways may cross stormwater tracts and easements.

33.653.040 Environmental Overlay Zones
If any portion of the stormwater management system or disposal system is proposed within an
Environmental Overlay Zone, it is subject to the regulations of Chapter 33.430,
Environmental Zones.
