ACKNOWLEDGEMENTS

This plan is the culmination of work over the past five years on the Central City Concept Plan, three quadrant plans (North/Northeast Quadrant Plan, West Quadrant Plan, Southeast Quadrant Plan), Natural and Scenic Resources protection plans, and the Bonus and Transfer Study. Many thanks to the thousands of stakeholders who participated in those processes and whose contributions helped to shape this plan.

Portland City Council

ZONING CODE AND OVERLAY ZONE MAP AMENDMENTS

Part 3: Environmental and Scenic

Introduction

- 33.430 Environmental Overlay Zones .......................................................... 1
- 33.480 Scenic Resource Zones....................................................................... 13
Commentary

33.430.033

The Scenic Resources zone is applied to view corridors and scenic corridors throughout Portland. Scenic resources are addressed by statewide land use planning Goal 5, along with natural, cultural and historic resources. When a scenic (s) overlay is applied in the same location as a conservation (c) or protection (p) overlay, the regulations of both this chapter and chapter 33.480 must be met. The recommendations of the Economic, Social, Environmental and Energy Analysis (ESEE) for the scenic resources, which are contained in various scenic resource protection plans, must be considered as part of environmental review.

33.430.020 Environmental Reports

The application of the environmental zones is based on detailed studies that have been carried out within eighteen separate areas of the City. The City’s policy objectives for these study areas are described in the reports. Each study report identifies the resources and describes the functional values of the resource sites. Functional values are the benefits provided by resources. The values for each resource site are described in the inventory section of these reports. The City has adopted the following eighteen environmental study reports:

- Balch Creek Watershed Protection Plan
- Columbia Corridor Industrial and Environmental Mapping Project
- East Buttes, Terraces and Wetlands Conservation Plan
- Fanno Creek and Tributaries Conservation Plan
- Johnson Creek Basin Protection Plan
- Northwest Hills Natural Areas Protection Plan
- Skyline West Conservation Plan
- Southwest Hills Resource Protection Plan
Commentary

33.430.033
Zoning code Chapter 33.480, Scenic Resource Zone, applies a scenic (s) overlay to view corridors. View corridors were designated in the Scenic Resources Protection Plan (1991). 33.480 is clear that if the s overlay overlaps with an environmental overlay zone, then the regulations of 33.430 must be met.

33.430.080.C.7.
Chapter 33.10 states that the city does regulate dredging within the river. This exemption allows dredging and channel maintenance within deep waters of the river and within the federal navigation channels. However, dredging in or near shallow water and beaches could have significant detrimental impacts on the habitat that the shallow water provides and is not exempt. Beaches and shallow water play important roles in the life cycle of aquatic species, including salmon, and impacts to these areas should be avoided and mitigated if the impacts can't be avoided. Shallow water is identified as water between zero and 20 feet deep, however using 35 feet as the trigger for review because the area between 20 and 35 feet deep represents an area of concern where the impacts of dredging could affect the habitat in the shallower areas.
• ESEE Analysis and Recommendation for Natural, Scenic and Open Space Resources within Multnomah County Unincorporated Areas
• Middle Columbia Corridor/Airport Economic, Social, Environmental and Energy (ESEE) Analysis

**33.430.033 Relationship to Scenic Resource Zone**
When a Scenic Resource zone has been applied at the location of an environmental zone, environmental review must include consideration of the development standards of Chapter 33.480, and the scenic qualities of the resource as identified in the Scenic Resources Protection Plan or the Central City Scenic Resources Protection Plan.

**33.430.080 Items Exempt From These Regulations**
The following items, unless prohibited by Section 33.430.090, below, are exempt from the regulations of this chapter. Other City regulations such as Title 10, Erosion Control, must still be met:

A.-B. No change

C. Existing development, operations, and improvements, including the following activities:

1. Maintenance, repair, and replacement of existing structures, exterior improvements, roads, public recreational trails, public rest points, public viewing points areas, public interpretative facilities, and utilities. Replacement is not exempt whenever coverage or utility size is increased;

2.-6. No change

7. Dredging, channel maintenance, and the removal of materials from rivers as follows:

   a. Dredging, channel maintenance, and the removal of material within the federal navigation channel;

   b. Dredging, channel maintenance, and the removal of materials outside the federal navigation channel as follows:

      (1) Dredging and the removal of materials in waters that are 35 feet deep or deeper; or

      (2) Channel, slip and berth maintenance that has been approved by the U.S. Army Corps of Engineers; and

   c. The placement of dredged materials within the environmental overlay zones is not exempt.
33.430.080.C.8.

The exemption applies to full removal of a tree or other vegetation as well as trimming of trees or vegetation.

Within a view corridor with special height restrictions trees may be removed or trimmed to preserve the view. There are two documents that designated view corridors with special height restrictions:

- The Scenic Resources Protection Plan (1991) applies to whole city.
- The Central City Scenic Resources Protection Plan (2017) applies to the Central City Plan District and surrounding lands. For the view corridors designated in the Central City Scenic Resources Protection Plan, the special height restrictions supersede the special height restrictions in the Scenic Resources Protection Plan. If the view corridor is not designated in the Central City Scenic Resources Protection Plan, then the special height restrictions of the Scenic Resources Protection Plan apply.
78. Removal or trimming of vegetation when no development or other activities subject to the development standards or review requirements of this chapter are proposed, if the following are met:

a. All vegetation removal or trimming activities must be surrounded or protected to prevent erosion and sediment from leaving the site or negatively impacting resources on the site. Permanent erosion control, such as replanting areas of bare soil, must be installed.

b. The vegetation proposed for removal or trimming is one of the following:

   (1) Trees or plants listed on the Nuisance Plant List;

   (2) Dead, dying, or dangerous trees or portions of trees when they pose an immediate danger, as determined by the City Forester or an arborist. Removing these portions is exempt only if all sections of wood more than 12 inches in diameter either:

       • Remain, or are placed, in the resource are of the same ownership on which they are cut; or

       • Are removed, if the City Forester authorizes removal of diseased wood because it will threaten the health of other trees;

   (3) Non-native non-nuisance trees and plants;

   (4) Trees or tree limbs that are within 10 feet of an existing building and structures attached to buildings, such as decks, stairs and carports;

   (5) Trees or plants that exceed the height restriction of a view corridor with special height restrictions designated in the Scenic Resources Protection Plan or Central City Scenic Resources Protection Plan. Trees that exceed the height restrictions of a City-designated view corridor may be removed or pruned to maintain the view corridor; or

   (6) Within the Scenic Resource zone, tree limbs may be trimmed to maintain a view. Tree removal is not exempt.

Renumber 8 - 11 to be 9 - 12

D.-E. No change
33.430.170 Standards for Resource Enhancement Projects

A. Bank reconfiguration. The following standards apply to bank reconfiguration projects that take place in the Bank Reconfiguration and Basking Features Area shown on Map 430-14. Slough and drainageway banks, which are the area between the ordinary high water mark and the top of bank, may be regraded when all of the following are met:

1.-7. No change

8. No structures are proposed except for public viewing areas developed as part of the project. The public viewing areas must meet the following:

a. The viewing area contains no more than 500 square feet of permanent disturbance area;

b. The viewing area is at least 30 feet from the top of bank of a stream, drainageway, wetland or other water body;

33.430.190 Standards for Major Public Recreational Trails

The following standards apply to major public recreational trails and public viewing areas developed in conjunction with the recreational major public trail. All of the standards must be met.

A.-C. No change

D. Tree removal and replacement standards are as follows:

1. Native trees 12 or more inches in diameter may not be removed. Each native tree more than 6 but less than 12 inches in diameter removed must be replaced as shown in Table 430-3;

2. Non-native non-nuisance trees may be removed if each tree at least 6 inches in diameter is replaced as shown in Table 430-3;

3. Trees listed on the Nuisance Plants List may be removed if each tree at least 6 inches in diameter is replaced with one tree; and

4. Replacement trees and shrubs must meet the planting standards of Subsection 33.430.140.K; and

ED. If a public viewing area is proposed, the following must be met:

1. The viewing area may create up to 500 square feet of permanent disturbance area;

2. The viewing area is at least 30 feet from the top of bank of a stream, drainageway, wetland or other water body; and

3. The viewing area is not in the floodway.
33.430.190.E.
Tree removal was 33.430.190.D. It was moved to the end of the subsection because tree removal is allowed in both the trail and the viewing area associated with the trail. The tree removal standards were also updated to simplify them and make them the same as the standards for tree removal within a scenic (s) resources overlay zone.

33.430.195
The regulations for the scenic (s) overlay zone are found in 33.480. The regulations are different for scenic corridors and view corridors. In scenic corridors, the intention is to preserve tree canopy. In view corridors, the intention is to allow some tree removal. This regulation in the Environmental overlay zone is to be clear that tree removal in view corridors that correspond with a conservation or protection overlay is allowed per the standard. This standard does not apply to scenic corridors.

The standard is intended to allow trees to be removed that are blocking a view. Natural resources, including trees, and scenic resources, including views, are both State Land Use Planning Goal 5 resources. The standards balance the benefits of both trees and the view by allowing tree removal within the view corridor and requiring those trees to be replaced outside of the view corridor. Native trees that are larger than 12 inches in diameter can be removed through Environmental Review.
E. Tree removal and replacement standards:

1. Native trees up to 12 inches in diameter and non-native trees of any size may be removed with hand-held equipment or equipment with a wheel/surface-to-ground pressure of no more than 7.5 psi;

2. Trees that are more than 6 inches in diameter that are removed must be replaced as shown in Table 430-3; and

3. Replacement trees must meet the planting standards in 33.430.140.K.

33.430.195 Standards for Tree Removal in the Scenic Resource Zone
The following standards apply to removal of native trees up to 12 inches in diameter and non-native trees of any size that are located within an Environmental overlay zone and the Scenic Resource zone:

A. Trees may be removed with hand-held equipment or equipment with a wheel/surface-to-ground pressure of no more than 7.5 psi;

B. Trees that are more than 6 inches in diameter that are removed must be replaced as shown in Table 430-3, and replacement trees must be planted outside of the Scenic Resource overlay zone;

C. Temporary disturbance areas caused by the tree removal must be replanted to meet one of the following options. Shrubs planted to meet this standard may be counted towards meeting the replacement requirements shown in Table 430-3:

1. Option 1. Three shrubs and four other plants must be planted for every 100 square feet of temporary disturbance area; or

2. Option 2. Three shrubs must be planted for every 100 square feet of temporary disturbance area and the remainder of the temporary disturbance area must be seeded with a grass and forb seed mix at a ratio of 30 pounds per acre; and

D. Replacement plantings must meet the planting standards in 33.430.140.K.

Environmental Review

33.430.250 Approval Criteria

A.–B. No change

C. Public recreational facilities. In resource areas of environmental zones, public recreational trails, rest points, public viewing points areas, and interpretative facilities will be approved if the applicant's impact evaluation demonstrates that all of the following are met:

D.–E. No change
Commentary

33.480.010 Purpose
BPS has produced a new scenic resources inventory and protection plan for the Central City and areas with view of or across the Central City. The Central City Scenic Resources Protection Plan updates and replaces some of the information and decisions of the Scenic Resources Protection Plan (1991).

33.480.020 Map Symbol
Before application of the environmental conservation and protection overlay zones there were scenic overlay zones based on the Scenic Resources Protection Plan (1991). The scenic overlays were removed when the environmental conservation and protection overlays were applied. It was assumed at that time that scenic resources would be addressed by Environmental Review. However, without the scenic overlays it is not possible to know when scenic resources must be considered. Therefore, the City reapplied the scenic overlay zones where they overlap with the environmental overlay zones.

33.480.010 Purpose
33.480.020 Map Symbol
33.480.030 Application of the Scenic Resource Zone
33.480.040 Development Standards
33.480.050 Tree Removal Review
33.480.060 Relationship to Environmental Zones

Map 480-1 Scenic Resources

33.480.010 Purpose
The Scenic Resource zone is intended to:

- Protect Portland's significant scenic resources that provide benefits to the public as identified by the City in the Scenic Resources Protection Plan (1991) and the Central City Scenic Resources Protection Plan (2017);
- Enhance the appearance of Portland to make it a better place to live and work;
- Create attractive entrance ways to Portland and its districts;
- Improve Portland's economic vitality by enhancing the City's attractiveness to its citizens and to visitors; and
- Implement the scenic resource policies, goals and objectives of Portland’s Comprehensive Plan.

The purposes of the Scenic Resource zone are achieved by establishing height limits within view corridors to protect significant views and by establishing additional landscaping and screening standards to preserve and enhance identified scenic resources.

33.480.020 Map Symbol
The Scenic Resource zone is shown on the Official Zoning Maps with a letter "s" map symbol.

33.480.030 Application
The Scenic Resource zone is to be applied to all significant scenic resources identified in the Scenic Resources Protection Plan or the Central City Scenic Resources Protection Plan. Any changes to land or development, including rights-of-way, within the Scenic Resource zone are subject to the regulations of this chapter.
Commentary

33.480.040.A.2

The base zones include height limits for development and vegetation. When the view corridor, shown in the Scenic Resources Protection Plan or the Central City Scenic Resources Protection Plan sets a height limit that is more restrictive than the base zone, the view corridor height limit takes precedence. In some situations, the view corridor height limit is not more restrictive than the height limits of the base zone; therefore, the base zone takes precedence.
33.480.040 Development Standards
The development standards of the Scenic Resource zone apply based on the mapping designations shown in the Scenic Resources Protection Plan or the Central City Scenic Resources Protection Plan. The standards for each subsection apply only to areas with that designation in the respective plan. The standards are measured from the outer boundary of the right-of-way unless specified otherwise in the ESEE Analysis and as shown on the Official Zoning Maps. In some cases, more than one development standard applies. For example, within a scenic corridor, a view corridor standard will apply where a specific view has been identified for protection.

A. View Corridors. All development and vegetation with a view corridor designation in the Scenic Resources Protection Plan or Central City Scenic Resources Protection Plan are subject to the regulations of this Subsection.

1. Purpose. The intent of the view corridor designation is to establish maximum heights within view corridors to protect significant views from specific designated viewpoints.

2. Standard. All development within the designated view corridors are subject to the height limits of the base zone, overlay zone or plan district, except when a more restrictive height limit is established by the view corridor. In those instances, the view corridor height limit applies to both development and vegetation. Removal of trees or limbs necessary to maintain the view corridor is allowed. When no development is proposed, tree removal is subject to the requirements of Title 11, Trees. Public safety facilities are exempt from this standard.

B. Scenic Corridors. All development and vegetation within a scenic corridor designation in the Scenic Resources Protection Plan or the Central City Scenic Resources Protection Plan are subject to the regulations of this Subsection.

1. Purpose. The scenic corridor designation is intended to preserve and enhance the scenic character along corridors, and where possible, scenic vistas from corridors. This is accomplished by limiting the length of buildings, preserving existing trees, providing additional landscaping, preventing development in side setbacks, screening mechanical equipment, and restricting signs. Property owners and others are encouraged to make every effort to locate buildings, easements, parking strips, sidewalks, and vehicle areas to preserve the maximum number of trees.

2. Standards.
   a. Scenic Corridor Setback. A scenic corridor setback per Table 480-1 applies along street lot lines that abut the Scenic Corridor identified in the Scenic Resources Protection Plan.
   b. Side building setbacks. Buildings, garages, and covered accessory structures are not allowed within the side building setbacks within the first 100 feet from the designated resource.

[1] Larger minimum setbacks in overlay zone and plan district supersede this setback

---

c. Limiting structure length. No more than 80 percent of the length of any site can be occupied by structures, excluding fences, as measured parallel to the scenic corridor. This standard applies to an entire attached housing project rather than to individual units.

d. Limiting blank facades. Long, blank facades create uninteresting elements along a scenic corridor. This standard applies to all portions of buildings within 100 feet of the designated resource. Residential structures are exempt from this standard. Blank facades must be mitigated for in at least one of the following ways:

1. The maximum length of any building facade is 100 feet.
2. Two rows of trees, one deciduous and one evergreen, must be planted on 30-foot centers along the length of the building between the structure and the protected resource.
3. Facades facing the scenic corridor must have a minimum of 40 percent of surface area in glass. Mirrored glass with a reflectance greater than 20 percent is prohibited.

e. Landscaping. The entire required scenic corridor setback must be landscaped to at least the L1 level unless the more stringent standards below or in other chapters of this Title apply. Up to 25 percent of the entire area of the scenic corridor setback may be used for vehicle and pedestrian areas except that each lot is allowed at least a 9-foot wide driveway or parking area and a 6-foot wide pedestrian area. Additionally, areas within the adjacent right of way must be landscaped to standards approved by the City engineer. The required landscaping in the setback and adjacent right of way must be provided at the time of development, except as allowed in B.2.e(1) below.
h.1 Most scenic corridors will have multiple view corridors located along the street or trail. Removal of some trees within the view corridors may be needed to maintain view.
(1) When alterations are made to a site with an existing nonconforming use, allowed use, limited use, or conditional use, and the alterations are over the threshold stated in 33.258.070.D.2.a, the site must be brought into conformance with the landscape standards above. The value of the alterations is based on the entire project, not individual building permits. The cost of the upgrades required by this chapter may be counted toward the cost of upgrades required by Subsection 33.258.070.D. However, the upgrades required by this chapter must be completed first.

(2) Area of required improvements. Except as provided in 33.258.070.D.2.c(2), Exception for Sites With Ground Leases, required improvements must be made to the entire site and adjacent right of way. If the ground lease is adjacent to a right of way within the scenic corridor, the upgrades required by this chapter also apply to the right of way adjacent to the ground lease.

(3) Timing and cost of required improvements. The timing and cost of the required improvements is specified in 33.258.070.D.2.d. However, where 33.258.070.D.2.d refers to the standards listed in 33.258.070.D.2.b, the landscape standards above, are also included.

f. Screening. All exterior garbage cans, garbage and recycling collection areas, and mechanical equipment (including heat pumps, air conditioners, emergency generators, and water pumps) must be screened from view or not visible from the designated scenic corridor. Small rooftop mechanical equipment, including vents, need not be screened if the total area of such equipment does not exceed 10 square feet per structure.

g. Fences and hedges. The total maximum height of fences, hedges, and berms within the scenic corridor setback, and when allowed in the adjacent right of way is 3-1/2 feet. This provision does not apply to any required screening and buffering.

h. Preservation of trees. This provision does not apply if the property is regulated by state statutes for forest management practices. All trees 6 or more inches in diameter that are within the scenic corridor setback and right of way must be retained unless removal conforms to one or more of the following standards.

(1) The tree is located within a view corridor designated in the Scenic Resources Protection Plan (1991) or the Central City Scenic Resources Protection Plan (2017);
(12) The tree is located within the footprint or within 10 feet of existing or proposed buildings and structures attached to buildings, such as decks, stairs, and carports, or within 10 feet of a proposed driveway;

(23) The tree is determined by an arborist to be dead, dying or dangerous;

(34) The tree is on the *Nuisance Plants List*;
Commentary

33.480.060
This was removed from 33.480, Scenic Resource Zones, and 33.430, Environmental Zones, was updated to reflect this language.
(45) The tree must be removed due to installation, repair, or maintenance of water, sewer, or stormwater services. For new installation of services, tree removal allowed under this provision is limited to a single 10 foot wide utility corridor on each site;

(56) The tree is within a proposed roadway or City-required construction easement, including areas devoted to curbs, parking strips or sidewalks, or vehicle areas;

(67) The tree is within 20 feet of a Radio Frequency Transmission Facility antenna that is a public safety facility. The distance to the antenna is measured vertically and horizontally from the edge of the antenna. See Figure 480-1.; or (78)

(78) The tree is at least 6 and up to 12 inches in diameter and does not meet any of the other standards of this subparagraph, but is replaced within the scenic corridor setback or adjacent right of way according to Table 480-2. Replacement plantings must meet Section 33.248.030, Plant Materials.

33.480.050 Tree Removal Review.

A. Tree removal without development. When no development is proposed, tree removal allowed by the standards of Subparagraph 33.480.040.B.2.h is subject to the tree permit requirements of Title 11, Trees.

B. Tree removal in development situations. When tree removal is proposed as part of development, the standards of Subparagraph 33.480.040.B.2.h apply in addition to the tree preservation standards of Title 11, Trees.

C. Trees that do not qualify for removal under Subparagraph 33.480.040.B.2.h may be removed if approved through tree review as provided in Chapter 33.853, Tree Review. However, where the tree removal would require environmental review, only environmental review is required.

33.480.060 Relationship to Environmental Zones

When an environmental zone has been applied at the location of a designated scenic resource, the environmental review must include consideration of the scenic qualities of the resource as identified in the ESEE Analysis for Scenic Resources. The development standards of this Chapter must be considered as part of that review.
WHAT’S IN THE CENTRAL CITY 2035 PLAN?

**Volume 1: Goals and Policies**
