

COMMUNITY-BASED SOLUTIONS

We want to live in safe, happy communities
that are mixed income, intercultural, and diverse.
Home is our sanctuary.

If we are giving TriMet and our local government public money, then
the community should get...

STABLE HOUSING

- Ensure that our rent and housing costs remain affordable, stable, and predictable.
- Build more affordable and regulated buildings for our families.
- Protect our right to organize our buildings, and ensure that our landlords recognize our unions and negotiate with us.
- End the discrimination and harassment from our landlords.
- Cap our security deposits and protect them from being taken unfairly.
- End no cause terminations of our rental agreements.
- Do not allow discriminatory screening criteria that keeps our families from getting housing like expecting us to make three times the rent.
- Stop our landlords from pocketing our application fees without ever processing our applications.

AFFORDABLE TRANSPORTATION

- Do not raise our bus/train fares beyond what they are now.
- Construct the light rail in a timely manner to minimize disruption of our daily activities.
