(*) Only \$2.0 million of this difference is an ongoing increase.

Financial Forecast Resources Exceed Estimated Requirements

- ♦ Continued strong revenue growth and lower health benefit cost increases have combined to deliver ongoing and one-time resource availability to Council's FY2008-09 budget process.
- Resources are increased by \$28.3 million in this forecast as compared to last June. Revenues are up across-the-board led by business license fees, transient lodging taxes, and property tax revenues. Forecast beginning balance is higher by about \$10.1 million in this forecast.
- ◆ The five-year financial forecast shows that Council can increase support for ongoing budgets by about \$7.9 million, leaving about \$26.5 million for one-time budgets and projects. Allocation of resources above "CAL" to ongoing budgets is not without some risk. A turn in the economy would make it difficult to sustain ongoing budget increases.

Regional Economic Growth Story Remains Intact

Current Outlook

Regional economic growth was brisk throughout FY2006-07. Although employment growth slowed towards the tail end of last revenue fiscal vear. strona growth in the "cyclicals" (transient lodging taxes and business licenses) indicates that this expansion remains intact. The subprime financial mess, however, represents a major uncertainty both for the national and regional economies. It is still unclear as to how bad the financial fallout is going to get and what the ultimate impact on the economy will be. For now, the impact does not appear to have started a recession.

Health Benefits Costs

This five-year financial forecast continues to uses a "95/5" health care cost split. The City's share of health premiums is 95%. The consultant's (AON) current forecast calls for FY2008-09 costs to increase by 7.3%. Out-year inincreases average about 10%.

These steep cost increases make it difficult for the General Fund to increase ongoing budgets.

	M50 Assess. Value \$1000	\$41,731,475	State Cigarette & Liquor	
	FY2008-09 M50 Tax Base	\$191,004,961	Tax Revenues to City	\$12,036,210

	Total-County Levies	\$0	Current Forecast: FY2008-09	to FY2012-13

Forecast FY2008-09 resources have increased by about \$28.3 million compared to last June's forecast done in conjunction with Council's Adopted Budget. Revenues are up \$18.2 million (5.3%). Beginning balance is up \$10.1 million on data through October 17 (period 4). Forecast business license revenues continue to reflect Council's passage of Resolution #36473 which increases the Owners' Compensation deduction to \$80,000 and the gross receipts exemption to \$50,000 beginning tax year 2007. The resolution also expresses Council's intent to increase the Owners' Compensation deduction to \$125,000 over five years

and restructure the minimum charge. The forecast includes only the the initial change, rereducing revenues \$3.2 million. Council's intent is that all changes will be revenue neutral.

Most other revenue estimates are improved compared to June. Property taxes, transient lodging and utility license fee revenues are substantially higher on strong regional growth

Revenue Forecast RECAP, FY2008-09					
General Fund	Last June For	December			
Revenue Category	FY2008-09	Forecast	Difference

% Change In Resources		7.87%			

trends. "Transfers IN" include a large one-time \$2.9 million repayment to two loans made to the School's Surcharge Fund.

A key revenue forecast assumption is a "Measure 50" General Fund tax base levy of \$191.0 million. The forecast calls for 2.95% assessed value growth on taxable assessed values. About 0.25% of this growth results from new construction. Although FY2007-08 was a "good year," Measure 50 assessed value growth lags behind the "advertised" 3 percent minimum. Property tax revenue growth is for the most part coming in below the region's average inflation rate. In addition, this lowers the General Fund's overall potential growth rate making it more difficult to fund current services and ongoing bureau program CAL requirements.

The FPD&R levy is estimated at \$107.5 million. This represents a \$12.2 million increase over FY2007-08's \$95.4 million levy. This levy amount is an estimate and subject to receipt of a new five-year forecast from FPD&R as well as approval of the forecast and budget by FPD&R's board. Recent voter approval of Measure (*) Cigarette and liquor tax distributions.

26-53 will, over the coming years, substantially increase near term levy requirements.

THE BOTTOM LINE: A good regional economy continues to push revenue growth above long term trend growth. Health care cost increases for the past three years have been in the relatively low single digits although forecast out-years assume a return to double digit growth. Strong revenue growth together with lower health care cost increases delivers resources in excess of "CAL" requirements to the bottom line for Council's FY2008-09 budget process with a mix of ongoing and one-time resources available.

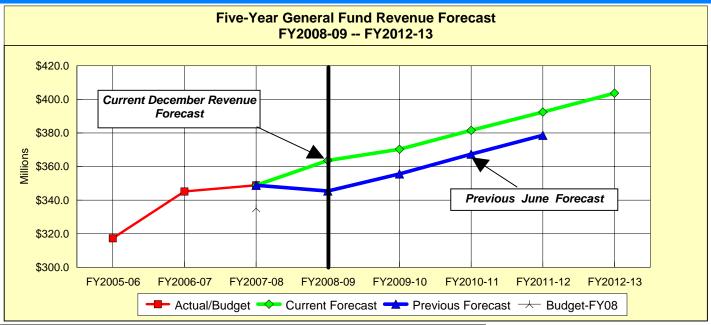

Figure 1-Current General Fund 5-Year Revenue Forecast

A key forecast assumption is a national economy that continues to expand at moderate rates and a growing regional economy. The metro area's economy has surpassed previous peak employment levels and continues to expand. The forecast absolutely depends on continued local area economic growth.

Figure 1 summarizes the 5-year revenue forecast off of the FY2007-08 base. Property tax revenue growth remains critically dependent on assessed value growth. Overall revenue growth is forecast to average 3.8% for the next five years reflecting continued good regional economic performance for the next couple of years. Transient lodging tax revenues and business license revenues, should grow at above trend rates consistent with an expanding economy.

Estimated FY2008-09 General Fund current allocation level (CAL) costs are up about \$1.9 million (0.6%) reflecting funding decisions as found in Council's Adopted Budget and previous financial plan. The forecast also includes an FY2009-10 \$2.7 million CAL target increase for Parks that "backfills" half of the loss of Parks' local option levy funding. Parks' local option levy expires at the end of the FY2007-08 fiscal year. Estimated CAL targets are also somewhat higher due to the use of higher cost escalation assumptions. The forecast also

includes a \$2.1 million provision, FY2008-09, funding the City's "Last Best Offer (LBO)" to the Portland Fire Fighters Association (PFFA). The \$2.1 million rises to \$3 million in FY2009-10 and this represents the estimated full ongoing impact of the City's LBO. At present contract negotiations with this bargaining unit remain unresolved. The City is also in negotiations with seasonal (mostly Parks) workers and this contract is also outstanding. A Parks CAL target adjustment will be made, if necessary, prior to the Proposed Budget to reflect the final outcome of these labor negotiations.

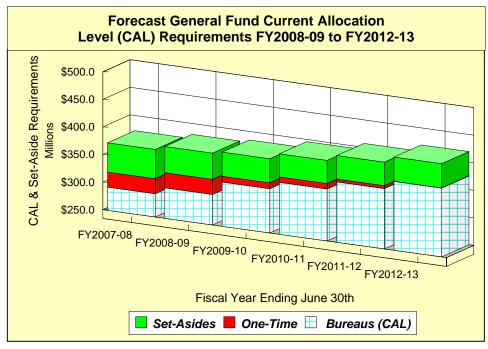

Figure 2-Current Service Level (CAL) Requirements

Assumed set-asides for FY2008-09 are as currently summarized in the table to the left:

- The compensation set-aside is about the same as forecast last June at \$7.9 million and reflects an assumed 3.3% COLA increase and a 7.3% health benefits cost increase (as forecast by the City's consultant AON).
- A "standard" capital set-aside (net of related debt service requirements) of \$1.9 million is assumed in the financial forecast.
- The General Fund's Pension Obligation Bond (POBS) debt service share is \$8.1 million for FY2008-09. With FY2008-09 the tenyear "ramp-up" in POBS debt service cost is completed. From here on out annual costs should increase by about 4% annually.
- Set-asides continue to assume a planned \$4 million transfer earmarked for computer aided dispatch (CAD) replacement.
- The financial forecast assumes a \$3.75 million transfer to the General Reserve Fund designed to keep the fund at the policy required 10% level. This is a new requirement not anticipated in the forecast done last June. Continued strong revenue growth has outstripped the ability

of interest earnings to keep the Reserve Fund at the 10% level.

This financial forecast uses a "standard" \$3.2 million contingency. Of this amount \$1.4 million is unobligated. The remainder is earmarked for the Police Bureau as has been Council's practice over past years.

Set-asides are up net by \$5.1 million compared to set-asides as assumed in last June's forecast. This increase is due to the \$3.7 million Reserve Fund transfer and inclusion in set-asides of the City "Last Best Offer" (LBO) to the Portland Fire Fighters Association. The reserve transfer is one-time, the LBO cost is ongoing. Ongoing costs are about \$2 million of the total increase.

The table below combines the FY2008-09 resource forecast with estimated bureau CAL require-

Sources & Uses of Funds: FY2008-09					
	Budget	FY2008-09			
Item	FY2007-08	Forecast			
FUND Revenues	\$335,223,172	\$363,613,788			
Beginning Balance	\$37,220,815	\$24,414,885			
FUND RESOURCES	\$372,443,987	\$388,028,673			
Less: Council Set-Asides.	(\$51,159,774)	(\$45,500,047)			
Less: Capital Set-Aside	(\$1,915,000)	(\$1,915,000)			
EQUALS: AVAILABLE TO					
BUREAU-PROGRAMS	\$319,369,213	\$340,613,625			
Reauired Bureaus CAL	\$319,369,213	\$306,246,258			
GAP/DIFFERENCE	\$34,367,368				
AVAILABLE Ongoing FY2	\$7,872,000				
New One-TimeFY2008	-09	\$26,495,368			

ments as updated in this financial forecast. Estimated resources total \$388.0 million. Assumed setasides total \$47.4 million leaving \$340.6 million against estimated bureau ongoing plus onetime of \$306.2 million. The positive difference of \$34.4 million drops to the bottom line and is available to Council's FY2008-09 budget process. The financial forecast splits this into \$7.9 million ongoing with about \$26.5 million for one-time budgets and projects. The out-years of the forecast continue to show substantial but declining amounts of onetime resources will be available to Council in subsequent budget cycles possibly FY2011-12.

The out-years of the financial forecast are improved somewhat and show amounts that should be available to Council as one-time funds. Additional ongoing is not available because of the strong escalation rate in health care costs as forecast by the City's health care consultant (AON). It is also important to point out that:

The current financial forecast shows that ongoing bureau CAL requirements plus an additional \$7.9 million for FY2008-09 can be sustained, but there is the risk that a recession, higher inflation or health care costs could easily result in the need for CAL reductions in some near term budget process.

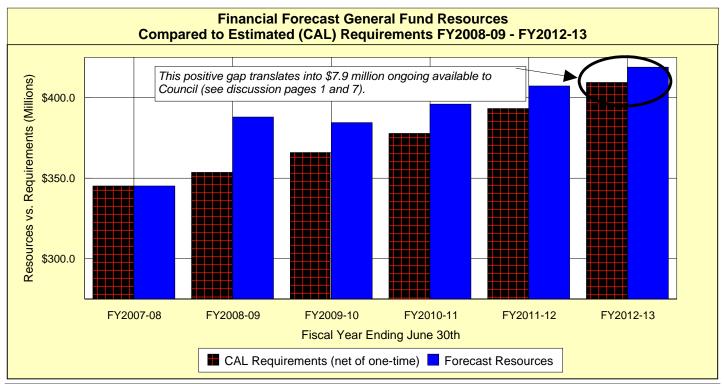

Figure 3-Financial Forecast Resources Compared to Requirements (See first table page 8)

FORECAST RESOURCES & REQUIREMENTS DETAIL NEXT TWO YEARS

The table below summarizes the next two years of the financial forecast General Fund resources and requirements:

- Resources total \$772.6 million for two-years ending FY2009-10.
- Requirements are currently estimated at \$722.9 million over twoyears.
- The General Fund is balanced for the life of the forecast with \$7.9 million ongoing for FY2008-09 with about \$36.7 million available over the next two budget processes for one-time budgets

Raw FY2008-09 Through FY2012-13 Five-Year Financial Forecast Summary

The "raw" financial forecast shows substantial amounts of funds available to the current and successive budgets with the annual amount available in excess of "CAL" requirements falling to just under \$9.5 million in the last year of the forecast (FY2012-13). This amount indicates roughly that an increase in ongoing CAL or programmatic requirements of \$7.9 million "discounted" for expected cost escalation is available and can be allocated as part of Council's budget deliberations for FY2008-09. This amount could have been much larger were it not for the expected out-year double-digit increases (as forecast by AON) in health benefits costs and a lowered business license revenue forecast due to recent reform.

Financial Forecast Five-Year Detail After Balancing

The financial forecast shows that the General Fund is balanced over the next five years by splitting resources in excess of "CAL" requirements into about \$7.9 million for ongoing programmatic increases with the remaining \$26.5 million allocated to one-time projects during FY2008-09. The out-years of the financial forecast show successively smaller amounts of one-time resources available to future budget cycles with little or nothing available in the last year of the forecast, FY2012-13. This balances the General Fund over the five-year forecast horizon.

Risks To The Financial Forecast

Although this forecast assumes continued economic expansion, there are uncertainties:

- Geopolitical uncertainties (energy, Iraq) could easily lead to recession.
- Financial uncertainties in the form of the subprime mortgage debacle continues to put the national economy at risk and could easily lead to recession.
- The five-year financial plan "back fills" about half on Parks' ongoing local option levy related revenue loss. The remaining \$2.7 million is not included in Council's five-year financial plan.
- The Oregon Legislature continues to look at the distribution of cigarette and liquor taxes to cities.

 There continues to be some risk that future legislative action could curtail distributions to cities.

^(*) Cigarette & liquor tax distributions to General Fund from State of Oregon

This table shows the resource forecast by budget categories as they appear in City budget documents. The italicized categories match to line items on the summary on page 2. Local Shared Revenues and Miscellaneous Revenues are collapsed into one simplified category on page 2 (Misc. & Local Shared) but are shown here in budget detail.

The Financial Forecast is written and produced by D.S. Barden, City Economist, Kourosh Ghaemmaghami, Senior Economist, Financial Planning Division dbarden@ci.portland.or.us (503-823-6954) and kmaghami@ci.portland.or.us (503-823-6957)

Discussion of PERS Pension Obligation Bonds (POBS) Debt Service Schedule

In November of 1999, the City sold \$300 million of Pension Obligation Bonds (POBS). The bond proceeds were used to eliminate the City's unfunded PERS pension liability. This reduced the City's employer's PERS contribution rate from 10.48% to 8.56% during FY2000-01. In selling bonds, the City avoided an immediate PERS employer contribution rate increase to 17.4%. The debt service costs were structured so as to phase in higher pension costs over a ten-year period ending FY2007-08.

Pension bond debt service is allocated to bureaus using a bureau's actual PERS contributions for the fiscal year in which the sale of the pension obligation bonds occurred as computed by Debt Management.

		Annual POB Debt Service			
Bureau PERS Percentage				FY2008-09	FY2009-10

The table below details POB debt service for the three out-years of the financial forecast. About half of the debt issued is variable interest rate debt. Actual annual debt service numbers will fluctuate year-to-year in response to short term interest rates. The out-year numbers must be viewed as approximate. Higher interest rates represent a risk to this and subsequent forecasts.

	2011	2012	2013
Out-Year Debt Service	\$25,282,350	\$26,377,638	\$27,354,788
