

# PERCENTAGE OF HOUSING UNITS WITHIN THREE MILES OF A FULL SERVICE COMMUNITY CENTER

FY2012-13 PORTLAND PARKS AND RECREATION

## BUREAU NOTES

PP&R's 2020 Vision includes a goal to "Provide a wide variety of high quality recreation services and opportunities for all residents." An objective of this goal, and a measure of the level of service, is to provide a full-service community center within 3 miles of every Portland resident. A full service community center includes a gymnasium, fitness and classrooms, and a pool.

This map shows the percentage of households in each neighborhood coalition that are within 3 miles of a full-service community center. The 3 mile distance is calculated using the walkable street and trail system, so community centers in areas with poor transportation circulation systems have smaller service areas and serve fewer people. The calculation also takes into account walkability to actual community center entry points. The analysis does not include smaller community centers or other facilities owned by PP&R and managed by partners.

PP&R is actively working to improve the level of service. In 2002, the percentage of households within 3 miles of a full-service community center was 36%; in 2011, it was 69%, in 2013 it was 70%.
