## OEHR response to Follow-up questions from Budget Work Session re: Equity

Following information is in response to the equity question from the Budget work Session asking: How much is spent on translation services by bureau?

OEHR requested assistance from OMF/Procurement Services to gather this data. Procurement Services was able to provide this data by analyzing the invoices in SAP based upon the contracts in place for FY 2012-13. Please note that this data includes translation and interpretation spend by bureau. Anything outside of existing agreements would not have been picked up.

One of the challenges identified in gathering this data is that bureaus may be using vendors to provide these services outside the existing contracts, which would mean that those funds would not be tracked.
