

RESIDENTIAL CURBSIDE RECOVERY RATE (recycling plus composting)

FY2013-14 PORTLAND BUREAU OF PLANNING & SUSTAINABILITY

BUREAU NOTES

Residential Curbside Recovery Rate

	Total Tons Collected	Total Tons Recovered	Recovery Rate (%)
CENT	NA	NA	NA
CNN	17,887	12,377	69.2%
EPNO	42,355	29,716	70.2%
NWNW	7,593	5,219	68.7%
NPNS	22,116	14,396	65.1%
NECN	23,471	16,115	68.7%
SEUL	59,902	41,066	68.6%
SWNI	29,203	21,074	72.2%

The 2007 Portland Recycles! Plan and the 2009 Climate Action Plan set citywide waste recovery goals (75 percent by 2015 and 90 percent by 2030, respectively). These objectives include waste generated in both the residential and commercial sectors. Portland businesses generate close to 80 percent of Portland's total waste, but the information is not reported geographically. In the residential sector, 17 garbage and recycling companies in Portland serve geographic areas that do not correspond to neighborhood boundaries, and in many cases companies serve multiple areas that are not contiguous.

This map shows the total material recycled and composted through Portland's residential curbside program, as a percentage of all material collected curbside, measured by weight. The curbside recovery rate is calculated for each residential garbage and recycling company using the tonnage they report collecting from their single family households and smallplex (2-4 units) customers. The estimated recovery rates for each neighborhood coalition are calculated by averaging the percent of each coalition served by a given garbage and recycling company by that company's overall recovery rate.

The curbside recovery rates on this map are calculated based only on materials collected curbside and do not take into account material recycled through the bottle bill, dropped off at depots, or other means. Thus the recovery rates shown on this map are lower than the actual residential recovery rate calculated for the city. Compared to the national average recovery rate of 35%, all areas of Portland are doing very well.

LEGEND

Percentage (%) of Total Residential Curbside Material Recovered, 2013

- 60.1%- 70%
- 70.1% - 80%

GIS Data Classification Method - Manual
2 classes illustrate the consistency across the City Data Ranges by Coalition: 65.1% through 72.2%
