**Darker Blue = More Yeses**

**Goldenrod = Area where there was a somewhat even split between Yes and No.**

*Note: Many people did not feel strongly about the Nos and left them blank or said they were negotiable or said they were choosing them because programs were related to regulatory compliance so felt PUB would have less impact.*

\* One response suggested BES-6 and BES-8 should not be separate program offers so should be considered together.

\* Stated reason for saying no to focusing on PWB-21 Treatment “The massive scope of this topic should already be addressed as PUB maintains oversight of the Filtration Plant project on its own schedule and terms.”

\*\* For PWB-22 Conduits/Transmission Mains - Are you generally interested in conduits or specifically as they are connected to the filtration project?
