Contact	First Name Sam	Last Name Watson
Title	Owner	Email: greenskycollective@gmail.com

**1. Please describe your plan to prevent theft at the licensed premises, including robberies, burglaries, and shoplifting.**

Surveillance cameras are installed throughout the interior and exterior that provide visual, recorded coverage of all activity, including patient check in, sales transactions, vendor transfers, etc. There are monitors set up to allow staff to supervise activity in and around the dispensary so that robberies, burglaries, and shoplifting are mitigated or prevented entirely.

The alarm system provides coverage of doors, windows, and motion in all facility rooms. When the facility is closed, the alarm will send a notification to law enforcement and management in the event of any attempt to breach a door or window, or movement is detected within a room. If, while the facility is open, someone attempts to rob the dispensary, there are six panic buttons installed (three are worn on the employee's person) that employees can trigger to send a silent notice to law enforcement.

Inventory is always securely maintained:

- To prevent shoplifting when the facility is open and product is available for sale, it is kept on display in a locked case and only accessible by employees. No excess inventory is in the dispensing room.
- To prevent theft when the facility is closed, all marijuana products and cash are kept in safes that are installed in locked rooms.
- When a customer is in the dispensing/sales room, or a vendor is allowed in for product transfer, an employee monitors their activity and never leaves any visitor unattended.
