

i would like to recommend nwda/transportation take on the ridiculous issue of garbage/recycling trucks. since mult-family are considered 'commercial' and have no franchise areas, the extreme noise from these vehicles dogs us 6 to 7 days a week. they're supposedly not to pick up until after 6am, and the majority of time that's the case (it's as late as 6:23, 6:17, 6:03). BUT it's not at all uncommon for them to be out slamming/crashing/belching noise considerably earlier -- one lovely monday morning i was awakened at 4:12am, AFTER being awakened the previous day (yes sunday) at 6:10.

saltzman's office kicks it over to the office of solid waste, that office tells me there's nothing they can do except "send a letter" to a hauler that they've "received a complaint." oh yeah, that'll do the trick. thanks for that.

i may seem like a stretch for transportation to take this on, and i know it's a battle many have fought before. i nonetheless propose we fight for sanity on this neighborhood issue. thanks --
