

Sprinkler Companies with Certified Personnel

Certified by the Portland Fire Marshal's Office

As per Title 31.50.20.110, a certificate of fitness is required for the installation, alteration, testing, service or repair of automatic sprinkler systems. Permits are required for installation, removals, alterations and repairs.

Water-based fire protection systems are required to be inspected annually or as otherwise required by NFPA 25 or if there is a reason to believe that the system would fail to operate in an emergency. We require this test to be performed by an individual certified by the Fire Marshal's Office. COMPANIES ARE NOT CERTIFIED! The following companies employ individuals certified to perform this test. Your contract for services should specify that the work be done by an individual with a valid Certificate of Fitness for water-based systems. The following list is subject to daily changes. For the most current information, please contact (503) 823-3712.
