

## **Home Fire Safety Self-Inspection Checklist**

	Yes	No
Kitchen		
Stove and oven are kept clean and free of grease.		
The stovetop is clear of items that can burn.		
Range hoods are inspected regularly and cleaned as needed.		
Small appliances are unplugged when not in use.		
Adults stay in kitchen when stovetop is in use.		
When cooking, pan handles are turned in so children cannot pull on them.		
When cooking with grease or oil, a lid for the pan is kept nearby in case of fire.		
Housekeeping		
The home is not cluttered with clothes, magazines, newspapers and other items that can burn.		
Matches and lighters are stored in a secure place, out of reach of children.		
Candles are in non-tip over holders and are clear of combustibles.		
Lit candles are not left unattended.		
Interior finishes (sheetrock, ceiling) are in good condition.		
Stairways are in good repair (tread and handrails).		
Dryer lint trap is free from excessive lint build-up. Clean after each use.		
Dryer vents are free from excessive lint build-up, and outdoor vent flap opens when dryer is operating. Inspect and/or clean once a year.		
Gasoline and other flammable liquids are stored in closed metal containers away from heat, sparks, and children.		
Smoking Safety		
Smokers smoke outside the home.		
Smoking materials are disposed of properly:		
<ul> <li>Non-combustible, non-tip receptacles</li> </ul>		
Do not discard in planters, soil, or bark dust		
Dousing in water or sand is most effective		
Smokers do not smoke when oxygen is being used.		

Electrical All receptacle and switches are in good working condition – no evidence of arcing or overheating.  All receptacle and switch faceplates are installed and in good condition.  Kitchen and bathrooms have GFCI outlets on countertop surfaces within 6 feet of running water outlets and they are working properly.  Lighting fixtures are secured in place and in good condition.  Bulbs in light fixtures are the correct wattage for the lighting fixture.  Extension cords are not: (1) used as permanent wiring, (2) run through holes in walls, ceiling or floor, (3) run through doorways, windows or under carpets, or (4) attached to building surfaces.  Electrical cords are not worn or frayed.  If there are young children in the home, the home has tamper- resistant outlets.  If an appliance isn't working right, we stop using it and have it fixed.  The motors on refrigerator, dryer, and other electrical appliances are clean of dust and lint.  Heating Equipment  Anything that can burn is kept 3 feet from baseboard and wall heaters, portable heaters, woodstoves and fireplaces.  Portable electric space heaters, when used, are plugged directly into wall outlets and not into extension cords.  Portable ehaters are turned off when unattended.  Fireplace has proper screen and hearth.  Chimney is inspected annually by qualified professional and cleaned as needed.  Fireplace ashes are disposed of in non-combustible container.  Allow to cool before disposal.  Furnace is inspected and cleaned annually.  Hot water heater is set to no higher than 120 degrees Fahrenheit.  Windows and Doors  If there are young children in the home, only allow windows to open to 4 inches (install window stop or window guards).  Security bars or window stops or guards, if installed, shall have a quick release device.  Ensure that windows used for escape open easily – not obstructed or nailed/painted shut.  Doors open from the inside without the use of key, special knowledge, or effort.  Building Exterior  Address and building numbers are visible from stre		<u> </u>

knowledge, or effort.  Building Exterior  Address and building numbers are visible from street.		
Building Exterior Address and building numbers are visible from street.		
Address and building numbers are visible from street.	_	
Stairways are in good repair (tread and handrails).	Address and building numbers are visible from street.	
	Stairways are in good repair (tread and handrails).	

Natural gas meters are safe from vehicle impact.	
Combustible storage is removed (trash).	
Exits and exit pathways are unobstructed.	
There is no storage in/under stairways.	
Ground cover and bark dust free from cigarettes.	
Smoke Alarms	
Smoke alarms are installed on every level of the home.	
Smoke alarms are installed in every sleeping area.	
Smoke alarms are installed in immediate vicinity of every sleeping area (e.g. hallways).	
Smoke alarms appear to be free from tampering or damage.	
Smoke alarms are testing monthly and batteries replaced as needed.	
Carbon Monoxide Alarms	
Carbon monoxide alarms are installed on every level of the home.	
Carbon monoxide alarms are installed within 15 feet of every sleeping area.	
Carbon monoxide alarms are tested monthly and batteries replaced as needed.	
General	
There is a working fire extinguisher on every level of the home.	
Fire extinguishers are visible and accessible.	
Family or residents have a home fire escape plan which includes a meeting place.	
Home fire escape plan is practiced at least twice a year.	
There are at least two ways out of each bedroom (window, door).	
Everyone in the home can show how to smother a fire on their clothes with the Stop, Drop & Roll method.	
Everyone in the home knows how to call for emergency help – dial 9-1-1.	
Everyone in the home knows the home address and phone number.	
Burns are treated with cold water.
