Progress/Impact Measures Work Group Meeting

AGENDA

At the upcoming meeting, the work group will discuss progress/impact measures for the DEAP.

Questions to ponder for discussion:

What measures will we assess to gauge progress/impact for the DEAP's mission and across all goals and objectives?

Who are the DEAP's targeted (underserved/ excluded/ disadvantaged) populations?

From Plan narrative: "This digital equity action plan targets access and adoption gaps for excluded and disadvantaged communities, specifically those with low incomes, older adults, communities of color, people with disabilities and those with limited English proficiency."

As part of the DEAP assessment, if we want to identify promising/effective practices for reaching targeted populations to close access and adoption gaps (digital divide), how would we define "promising" or "effective"?
