RE: Sample Results for Benson Bubblers

Dear Chris,

Attached you will find the lead results for the water samples collected at four Benson Bubblers on June 3, 2016. The water samples were subsequently analyzed at the Portland Water Bureau Laboratory via EPA Method 200.8, an approved method for the analysis of lead in drinking water.

Please let us know if you have any questions on these results or any of the other information provided here.

Sincerely,

Yone Akagi, PE  
Water Quality Compliance Manager
