1. Please describe your plan to prevent theft at the licensed premises, including robberies, burglaries, and shoplifting.

We have the following security measures installed and in place for our facility to prevent theft- including robberies, burglaries and shoplifting.

- CCTV security camera system with 8 cameras -all in which cover specific areas where marijuana products are displayed and stored as well as front and rear entry ways. Our security camera system meets the requirements put forth by the state in regards to record data storage (see attached doc)
- We have an emergency back-up battery installed which will allow the camera system and alarm system to remain active for 90+ minutes in the event of loss of power.(see attached doc)
- The entire facility is equipped with a monitored alarm system that is registered with the Portland Police Bureau (see attached doc). Our alarm system comes with three separate 'panic' buttons ,
The alarm system comes complete with a 'glass break' sensor, motion sensors in each room , window sensors and door chime/sensors.
- We have two 800 pound safes which we utilize for product storage during and after business hours. One safe is utilized for cannabis product back stock, the other is used to store our shelf inventory after we close each evening. Both safes are under surveillance 24/7 as well as anchored to the floor.
- All cannabis products on the floor (located in the actual dispensary area, ready for sale) are displayed out of reach of customers and covered by security cameras.
- We ensure our employees are trained on all security measures in place including but not limited to the following:
 - *How to react in the event of a robbery: stay calm, cooperate and utilize panic buttons
 - *How to review CCTV footage and capture a still image of the assailant
 - *Basic profiling of patrons
- We utilize an inventory system daily and weekly to ensure all cannabis products are accounted for on a regular basis. Our POS system (MMJ Menu) allows for us to review real time inventory reports to compare against what is on our shelves and secured in the safes
