1. Please describe your plan to prevent theft at the licensed premises, including robberies, burglaries, and shoplifting.

At the dispensary located on 729 SE Powell Blvd, we use state of the art security cameras and alarming to secure the facility. The security was installed by Cannaguard. A local, licensed and registered security vendor specializing in securing cannabis business. Cameras are located in all rooms of the location, and show patients and employees that go through any ingress or egress on site. Cameras are strategically placed to capture patient check in, as well as all transactions. Cameras are located above all cash registers and points of sale.

Five panic buttons are located throughout the store. One at the front desk, one at each point of sale (2 total), one in the managers office and one in the book keepers office. Live camera views of alarm system are installed on 4 computers (front desk, manger, point of sale and book keeper). All staff is trained in panic button use and when these are tripped, it is a silent alarm with immediate police dispatch.

All alarm notifications are pushed directly to the managers cell phone (live camera views are also installed on the phone). If any alarm or notification is sent, the manager is called immediatley from Cannaguard dispatch and then the situation is handled accordingly. Depending upon the situation law enforcement is dispatched.

Motion and door sensors are located in all rooms of the dispensary as well. Glass break sensors are located in the lobby as well as the vending area, covering all window space with sensors. Tamper/shatter resistant film and opaque film are applied to the windows in the vending area to minimize visibility as well as protect the interior of the location, patients and employees alike.

After hour protocols are taken and all medication is locked in a safe and secure vault. No medication

2. Please describe your plan to control access to your establishment and ensure that no one under the age of 21 is admitted.

Firstly, we follow all OHA/OLCC guides/regulations regarding proper signage.

Secondly, we hand check ALL patients/customers that come into the dispensary.

We use a platform <https://www.proteus420.com/> for our dispensary management software. This software allows us to track patients/intake via scanning of their drivers licenses. This inputs their name, date of birth and ODL #. If they do not have an ODL the only other documents we allow for this purpose are out of state drivers licenses as well as passports. If they do not have any of that documentation they are not allowed into our facility.

As mentioned all of these documents are hand checked and if the person qualifies they are then led to the front door where it is manually opened by our front desk personnel. This is the ONLY way to get into the dispensary, being led in by one of our employees after all data is checked.

3. In order to reduce the possibility of underage persons, as established by law, from gaining access to marijuana products sold at the licensed premises, please describe your plan to educate patrons on the risks of marijuana use by minors.

Firstly, we follow all OHA/OLCC guides/regulations regarding proper signage (pregnancy poster, poisoning poster and educate before recreate poster) and compliance with the OHA hand out cards. These cards are given to each and every patient for all purchases. Signage is at all mandatory location (entrance, points of sales etc).

All medication/product that is vended to patients/customers is then put into A. a child proof container (child proof top) or B. put into a sealed bag (heat sealed) and both always have the proper labelling on them.

On top of this our employees answer any and all questions regarding keeping medication away from underage persons/pets.

4. Please describe your plan to ensure that marijuana products sold by your business are not consumed irresponsibly in public or in the immediate vicinity of the license premises.

All customers are told they cannot open or consume product on site. We have never had an issue with this (up until this point everyone has been compliant) but we do have protocols in place that we follow daily.

As long as a customer is on the premises, whether inside or out, they are continuously monitored by staff via the video surveillance system. A customer in the dispensing/sales room or the lobby is always in the presence of an employee who ensures that the customer does not attempt to sample or somehow consume marijuana during their visit. As customers exit the dispensary, but are still on the facility property, they are under watchful eye of staff via cameras. If a person is no longer inside, but still attempts to consume in the immediate vicinity, staff immediately inform the person that they are not allowed to consume in public; rather, they should consume only once they have reached their home/private location.

5. Please describe your plan to avoid potential negative impacts to neighborhood livability such as noise, parking or garbage from your patrons.

Our customer base at this point seems to be an older demographic (40-70 year old) so we have not had an issue with any noise/litter etc. This may change at some point in the future and if it does we treat all customers with respect but let them know that we are a neighborhood business and they need to treat our neighbors with respect. Unlike many dispensaries in Portland we have a large onsite parking lot so parking has never been an issue. Our grounds are walked daily in the am to pick up any litter that may occur (rare that it happens) and we also sweep/blow the main traffic areas to keep the outside clean.

Our neighbors know who we are are (we have introduced ourselves) and we have a very open/honest relationship that is based on communication and helping each other thrive in the community.

6. Please describe the process to respond to complaints from neighboring businesses and residents regarding the licensed premises.

As mentioned above our neighbors know who we are (we have introduced ourselves) and we have a very honest and transparent relationship that is based on communication and helping each other thrive in the community. Up to this point we have had zero complaints and our goal is to keep it this way. We understand that any possible problems can/will start here and we believe mitigating those immediately is of utmost importance. If complaints do arise we will be working with our neighbors to thoroughly mitigate any/all issues in a friendly and professional manner.

A side note that may be of interest - we have such a nice relationship with our neighbors that we allow them to use our parking lot (after we close) if they need to for overflow parking.

7. Please include any other pertinent information related to the licensed premises.

We appreciate the opportunity to be operating in the City of Portland and look forward to continuing to serve patients in the most professional manner. Thank you.
