Website: www.TheKingsOfCanna.com	Facebook Link:			

Primary Business Contact Information		
Contact	First Name Jerrod	Last Name Thompson
Title	Owner/Manager	
	Email: jerrodt04@gmail.com	

1. Please describe your plan to prevent theft at the licensed premises, including robberies, burglaries, and shoplifting.

The dispensary has a 24 hour surveillance system that is password protected. It also has an alarm system that is armed after business hours with 24 hour monitoring. Upon breach, the alarm system will contact local law enforcement authorities. At the closing of business, all products containing THC are locked into two safes in compliance with the OAR333-008-1140. When open, all the products containing THC are placed in glass display cases and are on the walls behind the glass display cases which only an employee can access. We have signs on all of the doors where marijuana could be present that read: Do Not Enter-Limited Access Area and all restricted areas have key coded locks on the doors and remain close at all times. Customers are never left alone on the floor without an employee present, and at no point does a customer ever physically deal with products while in the showroom. All customers have to show physical proof of valid government issued ID which we scan into the software where it is stored prior to entering the facility.

2. Please describe your plan to control access to your establishment and ensure that no one under the age of 21 is admitted.

On the front door upon entering the facility there are two signs that read "No Minors Permitted Anywhere on the Premises in English and Spanish. Upon entering the facility we have a front desk employee who checks people in. In order to be permitted into the showroom customers must have a current valid government issued ID that shows they are 21 or older. The receptionist then enters them into the CTS system before notifying the Budtender that a new customer is waiting and ready in the reception area. Every customer has to be buzzed in through an electronic door locking system to access the showroom where the marijuana products are located. We also have a camera that captures full frontal of each person that walks up to the receptionist desk.

3. In order to reduce the possibility of underage persons, as established by law, from gaining access to marijuana products sold at the licensed premises, please describe your plan to educate patrons on the risks of marijuana use by minors.

The dispensary uses child resistant, Phillips RX, opaque safety packaging that specifies the weight and/ or volume of usable marijuana in grams, milligrams or millimeters. Warnings of consumption and illegal transfer of product is also printed on the labels along with a warning which includes: "MEDICAL PRODUCT - KEEP OUT OF REACH OF CHILDREN" in bold capital letters. It is very important for us to educate our patrons about keeping the usable marijuana away from minors in a safe place. Educating them on the effects that a minor can have when a marijuana infused product is not properly packaged and put away in a safe location. We also have posters up at every POS station from the Oregon Health Authority discussing the effects on children, breastfeeding, etc. The main wall in the showroom has a framed Educate Before You Recreate poster. At check out every customer gets an 3.5" x 5" Oregon Health Authority card placed in their exit bag as well, which also covers how marijuana can make kids sick and has a poison center hotline to call in case of any emergency.

4. Please describe your plan to ensure that marijuana products sold by your business are not consumed irresponsibly in public or in the immediate vicinity of the license premises.

Every customer that comes into the facility and buys any products are informed from our staff that they cannot consume anything on the immediate vicinity or in public. If a customer is caught in person or on our surveillance consuming anything on the property, management will be notified to rectify the matter immediately and their account will be notated that they will no longer be allowed into the facility. We do our best to ensure this by heat sealing all our products in non-see through mylar bags that are also placed in exit bags. Along with signage on all POS systems that state no use of usable marijuana is permitted anywhere in the store or around the premises.

5. Please describe your plan to avoid potential negative impacts to neighborhood livability such as noise, parking or garbage from your patrons.

The dispensary is a very neat and quite space that blends right into the community. All of our employees are informed to park on residential streets to allow as much parking in the parking lot for the customers as possible. We support our neighbors by offering local neighborhood discounts and are compliant to all the recycling and trash needs. We make sure to dispose all our trash into their proper trash bins behind the buildings. Nothing we do in the store ever requires for marijuana infused products to be thrown away, as everything that comes into the store is packaged and ready for sale.

6. Please describe the process to respond to complaints from neighboring businesses and residents regarding the licensed premises.

Although we have not, to our knowledge, had to handle any complaints from neighboring customers or business owners we would take them very seriously and follow these steps:

- Fill Out and Incident Report
- Take there first and last name or business name
- Date of the Complaint
- Write down what the Complaint was for (description)
- Phone # of person or business making complaint
- Write down how the complaint was handled
- Make sure the complainant was satisfied with resolution
- Date the complaint was satisfied
- File and Scan the Incident Report for Records

Managers are responsible for resolving all complaints.

7. Please include any other pertinent information related to the licensed premises.

All managers have college degrees with extensive amounts of customer service. All employees have be sent through THC University and have a minimum of two years experience in the cannabis industry, and have been educated on the pertinence of professionalism and customer service. We also do a pre-shift meeting to discuss the current laws, regulations, new products, and any other concerns.
