8. Adjourn (7:30)	

The PAC was formed "to assist the project team to create a plan for ecological protection, enhancement, and recreational access at River View Natural Area. Each committee member brings a unique perspective that must be balanced with a community-wide vision. The committee's primary roles are to help engage the community, balance local and citywide needs and perspectives, and assist Portland Parks & Recreation to serve people of all ages and abilities and accommodate a range of activities that promote health and wellness, arts and culture, and social interactions compatible with natural area functions."
