

Duniway Park Project Update March 2017

Hello Neighbors, Friends, and Users of Duniway Park!

It's **SUNNY**.....somewhere in the world, just not here in Portland.

Instead, the winter weather, with record snow and rain events, has not allowed for the final stages of construction on the track. We are still waiting on dry enough site conditions in order to install the last layers of track surfacing.

Unfortunately, this means that the site will continue to be an active construction site until **Summer 2017**. Crews are on-standby and will seize the moment when the weather shifts.

Please help us build a great facility!

We need your help. Please stay out of the active construction site until the fences are removed in **Summer 2017**. The track surface must stay clean between applications of the surfacing in order to maintain the structural integrity of the new track surface material.

Thank you for your patience and cross your fingers for dry, sunny weather.

For More Information

PP&R's Duniway Park project webpage, www.portlandoregon.gov/parks/68563, is the place to go for accurate and up-to-date information on the progress of the project.
