

## Duniway Park Project Update April 2017

Hello Neighbors, Friends, and Users of Duniway Park!

**April showers bring May... Duniway track surface installations.**

Track surfacing work will begin shortly!

Multiple days of sun and dry weather are in the forecast for the first week in May. You can expect to see construction activities at Duniway Park as early as Thursday April 27th. The work should take approximately three weeks with some possible delays due to, you guessed it, rain.

**Please help us build a great facility and stay off the track and field.**

We need your help to build your new high quality facility. Please stay out of the active construction site until the fences are removed. The track surface must stay clean between applications of the surfacing in order to maintain the structural integrity of the new track surface material.

Additionally, **the first layers of the surfacing are incredibly slick** and are not safe for walking or running on. Please stay safe and enjoy the sun (optimistically) at one of our other parks or natural areas.

**For More Information**

PP&R's Duniway Park project webpage, [www.portlandoregon.gov/parks/68563](http://www.portlandoregon.gov/parks/68563), is the place to go for accurate and up-to-date information on the progress of the project.
