EMERGENCY RESPONSE FOLLOWING A DISASTER

Following a disaster NET members should make sure their own household is secure and are able to deploy.

If a NET deployment order has been received deploy. If communications are down NETs may self deploy.

NETs are to proceed to the closest assembly site: Using the Damage Assessment (NET form 1) if possible.

If NETs meet volunteers (SUVs) bring them with you to be processed at the Assembly Site.

Damage Assessment will be turned into the TL and radio contact will be established by the TL to the ARO. The ARO will communicate with the PBEM.

The TL will designate teams of at least two NETs to specific assignments using proper ICS documentation

Communications Protocol

In Order of Availability, is:

Landlines/ Cell Phones

FRS/GMRS radios - channel 2, no privacy tone

Ham radio - NET-tac 1 (147.580, simplex) and

NET-tax 2 (147.540)
