☑ Pre-Housing Provider Workflow Changes

- Project Start date and Housing Move in Date eliminate the need for a provider to track services before client moved into housing.
- Project start date is the date you accept client in the project
- Housing Move in Date is the date client moves into housing (and will be considered the 'placement' date)
- This does not effect Screening provider if applicable.

What do you need to do?

Pre-Housing Provider Workflow Changes

- Any open “Agency – Project – Outreach” provider will add an Exit Date to the open Entry
 - If client already **has** an Entry into a Housing provider (RRH or PSH), update the Start (entry) date to be the Start (entry) Date of the Outreach provider.
 - Be sure to update the Housing Move In date appropriately (Original Housing Entry Date)

OR

- If the client **doesn't have** an Entry into a Housing provider (RRH or PSH), create one with a Start date of the Start (entry) Date of the Outreach provider.
 - Be sure to update the Housing Move In date appropriately
- *Project start date is the date you accept client in the project*
 - *Housing Move in Date is the date client moves into housing (and will be considered the 'placement' date)*
