# VEHICLE OPERATIONS

January 8, 2020

## 1. TAC Participants

Leslie Brunner, Recorder

## 2. High Level Summary

Overall the training was seen as being well-delivered, well-organized, and skillfully facilitated. The focus on officer and community safety is appreciated. There are no suggestions on how to improve this course at this time.

## 3. Comments and Suggestions

The training was delivered by PPB trainers Randy and Trevor. Trevor delivered most of the classroom/presentation portion and Randy assisted with the demonstrations. There was quite a lot of attention put to officers' safety when operating a vehicle and trying to pursue and stop another vehicle. They showed alternatives for how to get the other vehicle to stop, but always talked about safety of officers and community in the process. The training was in the classroom only and the demonstration with vehicles had been canceled on this particular day.

The trainer, Trevor gained great rapport with the group. He kept people engaged through asking questions, giving real life examples, using appropriate humor, and being knowledgeable and confident in front of the group. He was very effective in his delivery. Showing techniques and examples were very effective as well as illustrating on the white board.

Unfortunately, the practice in vehicles portion of the training had been canceled that day so was not observed.

The classroom portion was well-delivered, well-organized, and skillfully facilitated. There are no suggestions for improvement at this time.
