

# COVID-19 Gun Violence Trends

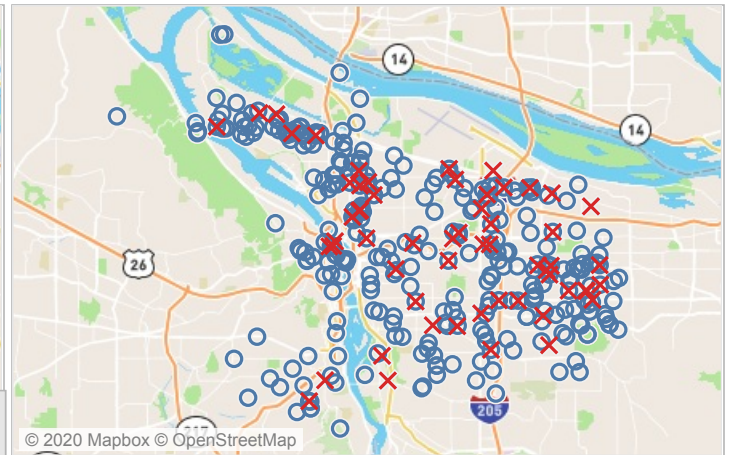

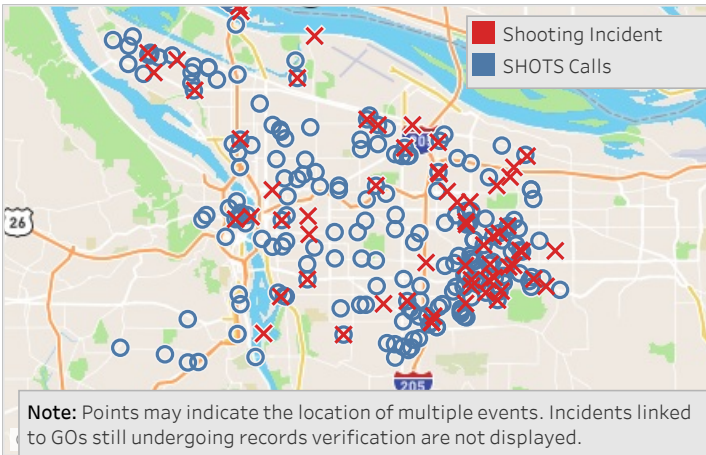

Pre-COVID Executive Order: 1/23/2020 - 3/11/2020

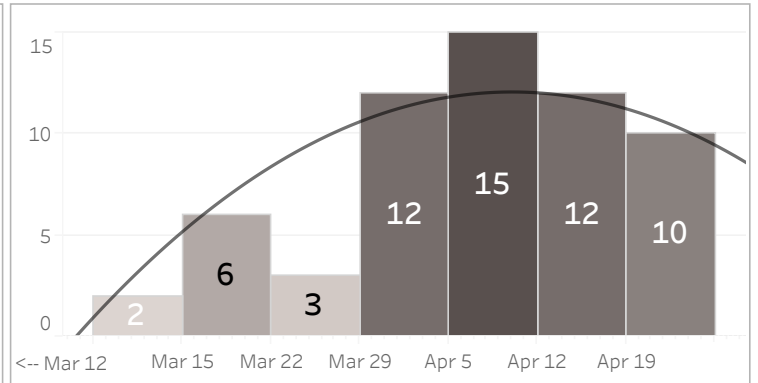

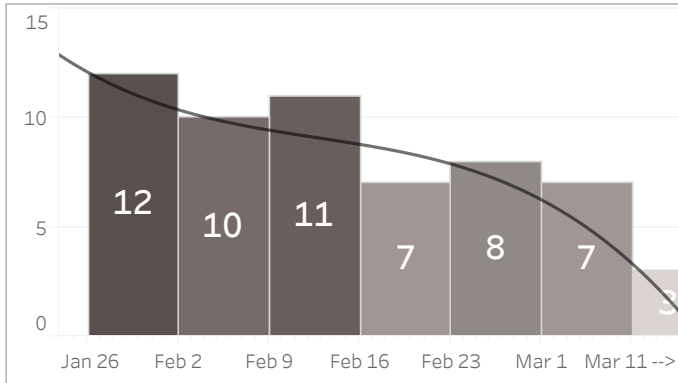

Post-COVID Executive Order: 3/12/2020 - 4/29/2020

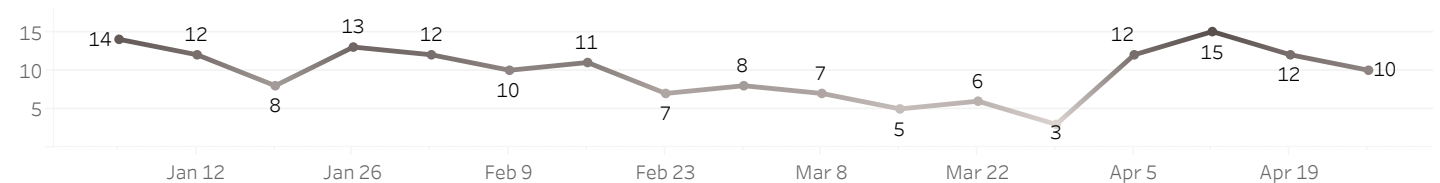

## Call & Incident Locations

## Incidents Compared Pre/Post Executive Order

## 2020 Week-to-Week Shooting Trends

**SHOTS FIRED:** On average, there have been **3 more calls/day** compared to last year and **2 more calls/day** compared to the weeks prior.

Although there has been an increase in reported Shots Fired calls, the number of confirmed incidents in SFIR decreased in the weeks following the school closure order. However, the week of March 29th saw a return to the high volume of shootings that occurred in January and early February. There has been an approximate 25 percent increase in verified shooting in 2020 compared to same time frame in 2019.

East Precinct has seen a 70% increase in non-suicide related shootings in 2020 compared to the same timeframe in 2019.
