The City of Portland has developed three new programs to increase access to hygiene for individuals experiencing homelessness. The City will be building two outreach trailers and one shower trailer and will be purchasing six portable toilets. The program will be managed and maintained in partnership with a local non-profit, business, or faith-based organization.

**Portable Toilets**
Six portable toilets will be purchased and placed in Downtown, Inner Southeast, and Outer East Portland. Two toilets will be placed at each location. Attendants will be responsible for managing each facility and will be present 7 days a week/12 hours per day. Each location will be equipped with handwashing stations; each location has an ADA compliant toilet.

**Mobile Outreach Trailers**
The City will build two outreach trailers. Each trailer will be equipped with:
- Two portable toilets (one will be ADA compliant)
- Garbage disposal bins
- Sharps disposal box
- Small storage lockers for personal items
- Phone charging station

These trailers will be managed by a social service agency. This agency must provide appropriate liability insurance and must abide by a service agreement. The trailer is provided to the organization at no cost, and the City will maintain servicing of the unit as outlined in the service agreement.

**Mobile Shower Trailer**
The City will build one shower trailer that includes:
- One ADA accessible shower and restroom
- Garbage disposal bins
- Sharps disposal box
- Small storage lockers for personal items
- Phone charging station

The trailer will be managed by a social service agency and is provided at no cost. The City maintains servicing of the unit as outlined in the service agreement.
