  - CLIMB chevron points uphill per approx. 300' of elevation change
  - SUMMIT elevation in feet
  - MAX LIGHT RAIL STATION
- \* ADT = average daily traffic

contour interval 100 feet Feb. 2014

Traffic conditions vary by time of day & day of the week. Traffic is usually heaviest weekdays in the early morning (7-9am) & the late afternoon (4-6pm). Also, many rural roads have high traffic speeds.

While we have made every effort to provide a high quality, accurate and useable map, the depicted roadway information is advisory only & may vary over time.
